## &lt;&lt;神经康复&gt;&gt;

## 内容概要

Including everything from basic theories to the latest breakthroughs in screening, treatments, diagnosis, and interventions, *Neurological Rehabilitation, 5th Edition*, is the classic neurology book for therapy students and clinicians alike. The book takes a problem-solving approach to the therapeutic management of movement limitations, quality of life, and more. With an emphasis on real-world problem solving, case studies in every chapter show the application of concepts presented. The text also details best practices put forth by the APTA and other leading physical therapy organizations. Includes all terminology, information, and practices consistent with *The Guide to Physical Therapy Practice*. References best practices from the beginning to the end of a patients' care with information from the most evidence-based research. Includes in-depth coverage with illustrations, case studies, and examples to make it easier to understand complex information. Applies concepts with case studies featured in each chapter, teaching problem-solving with real world examples. Covers non-conventional approaches to neurological interventions such as the movement approach, energy approach, and physical body system approaches. Four new chapters highlight important topics on movement and development across the lifespan, health and wellness, documentation, and cardiopulmonary interaction, not often found in one complete resource. Highlights hot button topics in physical therapy including neurological disorders and application issues such as poor vision, pelvic floor dysfunction, and pain. A complete revision of the chapters provides the most current information and research.

## 书籍目录

SECTION Theoretical Foundations for Clinical Practice 1 Theoretical Foundations for Clinical Practice 2  
Motor Development Across the Life Span 3 Contemporary Issues and Theories of Motor Control/Motor  
Learning, and Neuroplasticity: Assessment of Movement and Posture 4 The Limbic System: Influence over Motor  
Control and Learning 5 Psychosocial Aspects of Adaptation and Adjustment during Various Phases of  
Neurological Disability 6 Health and Wellness: The Beginning of the Paradigm 7 Differential Diagnosis Phase 1:  
Medical Screening by the Therapist 8 Differential Diagnosis Phase 2: Examination and Evaluation of Functional  
Movement Activities and System/Subsystem Impairments 9 Interventions for Clients with Movement Limitations  
10 Payment Systems for Services: Documentation through the Care ContinuumSECTION Management of  
Functional Problems and Movement Disorders Related to Specific Acute and Chronic Neurological Diseases and  
Trauma 11 Neonates and Infants at Neurodevelopmental Risk 12 Management of Clinical Problems of Children  
with Cerebral Palsy 13 Genetic Disorders: A Pediatric Perspective 14 Learning Disabilities 15 Beyond the  
Central Nervous System: Neurovascular Entrapment Syndromes 16 Neuromuscular Diseases 17 Traumatic Brain  
Injury 18 Congenital Spinal Cord Injury 19 Traumatic Spinal Cord Injury.....SECTION Neurological  
Disorders and Applications IssuesGlossaryIndex
