We offer a range of both public and private colleges, from small liberal arts colleges to large state universities, some well-known and some up-and-coming. A few are expensive (and worth every penny) while several manage to do the seemingly impossible (charge \$0.00 for tuition!), but all of the included schools offer students the best value for their college education.

The Princeton Review is the fastest growing test-preparation company in the country, with over 60 franchise offices in the nation. Each year, we help more than 2 million students prepare for college, grad school, professional licensing exams, and successful careers.
