

图书基本信息

书名：<<Winning solutions获胜的解决方案>>

13位ISBN编号：9780387947433

10位ISBN编号：0387947434

出版时间：1996-9

作者：Lozansky, Edward; Lozansky, E.; Rousseau, Cecil

页数：244

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

This book is intended to provide students with the appropriate mathematical tools and problem-solving experience to successfully compete in high-level problem solving competitions. In each section, the authors attempt to "fill in" the appropriate background and then provide the student with a variety of worked examples and exercises to help bridge the gap between what he or she may already know and what is required for high-level competitions. Answers or sketches of the solutions are given for all exercises. The book makes an attempt to introduce each area "gently" assuming little in the way of prior background - and teach the appropriate techniques, rather than simply providing a compilation of high-level problems.

书籍目录

Preface  
1 Numbers  
1.1 The Natural Numbers  
1.2 Mathematical Induction  
1.3 Congruence  
1.4 Rational and Irrational Numbers  
1.5 Complex Numbers  
1.6 Progressions and Sums  
1.7 Diophantine Equations  
1.8 Quadratic Reciprocity  
2 Algebra  
2.1 Basic Theorems and Techniques  
2.2 Polynomial Equations  
2.3 Algebraic Equations and Inequalities  
2.4 The Classical Inequalities  
3 Combinatorics  
3.1 What is Combinatorics?  
3.2 Basics of Counting  
3.3 Recurrence Relations  
3.4 Generating Functions  
3.5 The Inclusion-Exclusion Principle  
3.6 The Pigeonhole Principle  
3.7 Combinatorial Averaging  
3.8 Some Extremal Problems  
Hints and Answers for Selected Exercises  
General References  
List of Symbols  
Index
