<<神经系统解剖图谱Atlas of Ne>>

内容概要

The author John L. Fox shares his many years of teaching and surgery through more than three hundred illustrations and photographs (including over one hundred in color). Dr. Fox has published many works on neuroscience and clinical neurosurgery and is well-known for his color images of live neurosurgical anatomy as viewed through the operating microscope. Historic techniques, instrumentation and positioning, photographic techniques, cranial anatomy and the cranial flap, and intracranial anatomy as seen from the frontolateral or pterional approach are clearly discussed and illustrated from the operating (right sided) surgeons' perspective. The operations seen in this atlas for the main part involve aneurysms and some tumors. Directed toward neurosurgeons, neuroscientists, and anatomists, the book is intended to serve as an atlas of anatomy as well as a guide to clinical neurosurgery.

<<神经系统解剖图谱Atlas of Ne>>

书籍目录

Foreword by LUDWIG G. KEMPEPreface1 Historyofthe PterionalApproach BENGT LJUNGGREN and JOHN L. Fox2 Instrumentation and Positioning3 Photographic Technique4 Cranial Anatomy and the Cranial Flap5 The Sylvian Fissure6 The Carotid Cistern and Environs7 The Chiasmatic Cistern and Environs8 The Ambient and Interpeduncular CisternsIndex
