内容概要

Securitization : The Financial Instrument of the Future has SOMETHING for everyone who has a need to know about securitization : from the student in the university to the junior associate in the business world to someone like me who was around at the birth of securitization . It covers substantially all aspects of securitization from the dominant asset classes like mortgages to the more exotic asset classes like David Bowie bonds as well as the developed US and European markets to the emerging markets. Written in simple and accessible English , I especially like the many vignettes and casual observations to supplement what otherwise could have been, dry detailed recitations of technical . rules. I've rarely seen a book on securitization , that one could read like a novel.

作者简介 : Vinod Kothari is internationally recognized as a trainer, consultant and expert on Securitization, credit derivatives and asset-based funding. A chartered accountant and company secretary, Vinod is also the author of Credit Derivatives and Synthetic Securitization, Securitization, Asset Reconstruction and Enforcement of Security Interests and Lease Financing and Hire Purchase. His website, www.vinodkothari.com is one of the most frequently visited sites on securitization. Every year, through distance training, international workshops, industry forums and conferences in over two dozen countries, Vinod trains executives at all levels on complex financial topics such as securitization, synthetic CDOs and credit derivatives. Based in Kolkata, India, Vinod can be contacted at vinod@vinodkothari.com.
