<<Sectors 与风格>>

内容概要

The actions of politicians, regulators, and economic policy makers have an enormous impact on the financial markets. In *Sectors and Styles*, author Vincent Catalano offers an investment technique that takes these factors into account. He illustrates how you should index a portion of your stock portfolio to the market, while investing another portion in industry sectors that are likely to outperform the broader market. To determine "hot" sectors, Catalano provides a framework for analyzing government activity, the economy, and market activity. Through proper interpretation of these events, you'll learn how to outperform the markets, while mitigating downside risk.
