

<<生物信息学知识新发现>>

图书基本信息

书名：<<生物信息学知识新发现>>

13位ISBN编号：9780471777960

10位ISBN编号：047177796X

出版时间：2006-12

出版时间：John Wiley & Sons Inc

作者：Hu, Xiaohua (EDT)/ Pan, Yi (EDT)

页数：363

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<生物信息学知识新发现>>

### 内容概要

The purpose of this edited book is to bring together the ideas and findings of data mining researchers and bioinformaticians by discussing cutting-edge research topics such as, gene expressions, protein/RNA structure prediction, phylogenetics, sequence and structural motifs, genomics and proteomics, gene findings, drug design, RNAi and microRNA analysis, text mining in bioinformatics, modelling of biochemical pathways, biomedical ontologies, system biology and pathways, and biological database management.

#### 作者简介

Xiaohua Hu, PhD, is Assistant Professor of Computer Science in the College of Information Science and Technology at Drexel University. His research has been published in such journals as IEEE Computer, Knowledge and Information Systems, Journal of Intelligent Systems, and the International Journal of Applied Intelligence.

## 书籍目录

Contributors Preface 1 Current Methods for Protein Secondary-Structure Prediction Based on Support Vector Machines (Hae-Jin Hu, Robert W Harrison, Phang C Tai, and Yi Pan) 1.2 Support Vector Machine Method 1.3 Performance Comparison of SVM Methods 1.4 Discussion and Conclusions 2 Comparison of Seven Methods for Mining Hidden Links (Xiaohua Hu, Xiaodan Zhang, and Xiaohua Zhou) 2.1 Analysis of the Literature on Raynaud ' s Disease 2.2 Related Work 2.3 Methods 2.4 Experiment Results and Analysis 2.5 Discussion and Conclusions 3 Voting Scheme – Based Evolutionary Kernel Machines for Drug Activity Comparisons (Bo Jin and Yan-Qing Zhang) 3.1 Granular Kernel and Kernel Tree Design 3.2 GKTSEs 3.3 Evolutionary Voting Kernel Machines 3.4 Simulations 3.5 Conclusions and Future Work 4 Bioinformatics Analyses of Arabidopsis thaliana Tiling Array Expression Data (Trupti Joshi, Jinrong Wan, Curtis J Palm, Kara Juneau, Ron Davis, Audrey Southwick, Katrina M Ramonell, Gary Stacey, and Dong Xu) 4.1 Tiling Array Design and Data Description 4.2 Ontology Analyses 4.3 Antisense Regulation Identification 4.4 Correlated Expression Between Two DNA Strands. 4.5 Identification of Nonprotein Coding mRNA 4.6 Summary 5 Identification of Marker Genes from High-Dimensional Microarray Data for Cancer Classification (Jiexun Li, Hua Su, and Hsinchun Chen) 5.1 Feature Selection 5.2 Gene Selection 5.3 Comparative Study of Gene Selection Methods 5.4 Conclusions and Discussion 6 Patient Survival Prediction from Gene Expression Data (Huiqing Liu, Limsoon Wong, and Ying Xu) 6.1 General Methods 6.2 Applications 6.3 Incorporating Data Mining Techniques to Survival Prediction 6.4 Selection of Extreme Patient Samples 6.5 Summary and Concluding Remarks 7 RNA Interference and microRNA (Shibin Qiu and Terran Lane) 7.1 Mechanisms and Applications of RNA Interference 7.2 Specificity of RNA Interference 7.3 Computational Methods for microRNAs 7.4 siRNA Silencing Efficacy 7.5 Summary and Open Questions 8 Protein Structure Prediction Using String Kernels (Huzefa Rangwala, Kevin DeRonne, and George Karypis) 8.1 Protein Structure: Granularities 8.2 Learning from Data 8.3 Structure Prediction: Capturing the Right Signals 8.4 Secondary-Structure Prediction 8.5 Remote Homology and Fold Prediction 8.6 Concluding Remarks 9 Public Genomic Databases: Data Representation, Storage, and Access (Andrew Robinson, Wenny Rahayu, and David Taniar) 9.1 Data Representation 9.2 Data Storage 9.3 Data Access 9.4 Discussion 9.5 Conclusions 10 Automatic Query Expansion with Keyphrases and POS Phrase Categorization for Effective Biomedical Text Mining (Min Song and Il-Yeol Song) 10.1 Keyphrase Extraction-Based Pseudo-Relevance Feedback 10.2 Query Expansion with WordNet 10.3 Experiments on Medline Data Sets 10.4 Conclusions 11 Evolutionary Dynamics of Protein – Protein Interactions (LSSwapna, BOffmann, and NSrinivasan) 11.1 Class I Glutamine Amidotransferase – Like Superfamily 11.2 Drifts in Interfaces of Close Homologs 11.3 Drifts in Interfaces of Divergent Members 11.4 Drifts in Interfaces at Extreme Divergence 11.5 Conclusions 12 On Comparing and Visualizing RNA Secondary Structures (Jason TLWang, Dongrong Wen, and Jianghui Liu) 12.1 Background 12.2 RSmatch 12.3 RSview 12.4 Conclusions 13 Integrative Analysis of Yeast Protein Translation Networks (Daniel DWu and Xiaohua Hu) 13.1 Protein Biosynthesis and Translation 13.2 Methods 13.3 Results 13.4 Conclusions 14 Identification of Transmembrane Proteins Using Variants of the Self-Organizing Feature Map Algorithm (Mary Qu Yang, Jack Y Yang, and Craig W Codrington) 14.1 Physiochemical Analysis of Proteins 14.2 Variants of the SOM Algorithm 14.3 Results 14.4 Discussion and Conclusions 15 TRICLUSTER: Mining Coherent Clusters in Three-Dimensional Microarray Data (Lizhuang Zhao and Mohammed J Zaki) 15.1 Preliminary Concepts 15.2 Related Work 15.3 The TRICLUSTER Algorithm 15.4 Experiments 15.5 Conclusions 16 Clustering Methods in a Protein – Protein Interaction Network (Chuan Lin, Young-Rae Cho, Woo-Chang Hwang, Pengjun Pei, and Aidong Zhang) 16.1 Protein – Protein Interaction 16.2 Properties of PPI Networks 16.3 Clustering Approaches 16.4 Validation 16.5 Conclusions References Index
