<<Neo-Classical Design>>

内容概要

This splendid collection of elegant designs makes it a snap to add a neo-classical touch to almost any print or craft project. Motifs taken from vases, wall panels, candelabra, and other sources depict human and mythical figures, musical instruments, florals, foliates, and a host of other subjects. Reproduced from rare engravings, the lovely designs will inspire commercial artists and find wide use among craftspeople working in a variety of areas.
