## <<Handbook of ICU Ther>>

### 内容概要

Handbook of ICU Therapy provides rapid access to important information on the treatment of the critically ill patient. It comprises a series of 'cutting edge' reviews of the most advanced treatment concepts available in the modern ICU. Whilst assuming a basic knowledge of underlying conditions, it nonetheless outlines key physiological principles where necessary, and critically reviews current literature and best practice. The heart of the book is aimed at providing key practical information on treatment techniques to the busy clinician in an easily accessible style. In addition to conventional drug therapy, ventilator, fluid and physical therapies are also discussed in detail. All of the authors are directly involved in ICU research and practice and are familiar with all of the latest developments in this fast-moving field of medicine.

<<Handbook of ICU Ther>>

作者简介

Ian MConachie has been a consultant in anaesthesia and intensive care for over 15 years, prior to this, he lectured extensively in anaesthesia, and he is now a primary examiner for the Royal College of Anaesthetists.

<<Handbook of ICU Ther>>

书籍目录

List of contributors  
Preface  
Part I. Basic Principles  
1. Cardiac function, monitoring, oxygen transport  
2. Shock  
3. Oxygen therapy  
4. Central venous access  
5. Fluid therapy in ICU  
6. Anaemia and blood therapy  
7. Nutrition  
8. Non-invasive mechanical ventilation  
9. Principles of IPPV  
10. Modes of ventilation and ventilatory strategies  
11. Weaning and tracheostomy  
12. Vasoactive drugs  
13. Infection and infection control  
14. Sedation, analgesia and neuromuscular block  
15. Continuous renal replacement therapy  
16. Withholding and withdrawing therapy in the ICU  
Part II. Specific Problems:  
17. The surgical patient in the ICU  
18. The trauma patient  
19. Acute Coronary Syndromes  
20. Heart failure  
21. Arrhythmias  
22. The patient with sepsis  
23. Acute renal failure in the critically ill  
24. Acute lung injury and ARDS  
25. The patient with gastrointestinal problems  
26. The comatose patient  
27. The critically ill asthmatic  
28. The critically ill diabetic  
29. The cardiac surgical patient in the ICU  
30. Cardiac arrest
