## 内容概要

The proliferation of international institutions and their impact has become a central issue in international relations

◦ Why do countries comply with international agreements and how do international institutions influence national policies ?

Most theories focus on the extent to which international institutions can wield ' carrots and sticks ' directly in their relations with states.

Xinyuan Dai presents an alternative framework in which they influence national policies indirectly by utilizing non-state actors ( NGOs , social movements ) and empowering domestic constituencies.

In this way , even weak international institutions that lack ' carrots and sticks ' may have powerful effects on states.

Supported by empirical studies of environmental politics , human rights and economic and security issues , this book sheds fresh light on how and why international institutions matter.

It will be of interest to students , scholars and policymakers in both international relations and international law.
