<<运动医学手术图谱 Surgical A>>

内容概要

Clinically oriented and richly illustrated, this single-volume reference provides complete guidance on the surgical management of sports related injuries of both the upper and lower extremities. Readers will find step-by-step, illustrated how-to's for each of the more than 70 surgical procedures. Discusses indications, techniques, post-operative management, rehabilitation, complications, and outcomes for each procedure.

Illustrates all of the latest surgical techniques for more than 70 surgical procedures open as well as arthroscopic procedures, including arthroscopic synovectomy · posterolateral corner · ankle, shoulder, and elbow arthroscopy · superior labral anterior/posterior injury · and arthroscopy/triangular fibrocartilage complex (TFCC) injuries. Features over 600 illustrations, including drawings of techniques, arthroscopic views, x-rays, and MRIs. Uses an anatomic organization for easy access to information.
