## 内容概要

This richly illustrated textbook and atlas brings together high-quality, color colpophotographs that highlight all the variations seen in colposcopic practice. Its unique organization highlights the correlations between cytology, colposcopy, and histology, just as is needed when examining patients. Each chapter addresses a specific topic, from basic science to clinical colposcopy, written and edited by a well-known, recognized expert. Atlas images are incorporated into the text alongside relevant discussions, and descriptive graphics clarify topics such as low and high grade CIN, and cancer and glandular lesions. Easy-to-read bulleted information throughout the chapters emphasizes key points and makes information easy to locate. Multiple authors represent a collaboration of the best and most prestigious investigators and clinicians in the field, writing on their individual areas of expertise.

Many high-quality, color colpophotographs promote critical pattern recognition skills that are fundamental to clinical practice. Bullet points throughout the chapters allow readers to quickly scan the text and save time when referencing a specific topic of interest. A list of key points at the end of the chapter serves as a brief summary and review of essential information. Sample cases illustrate important concepts in a clinically relevant context. The unique layout presents colposcopy, cytology, and histology pages in a format that makes correlations easy to see and understand. Patient management is outlined in clear, unambiguous terms, including practical, evidence-based algorithms for virtually all possible scenarios.

## 书籍目录

Dedication  
Preface  
1 Epidemiology of Genital Tract Human Papillomavirus Infections  
2 Human Papillomaviruses: Molecular Aspects of the Viral Life Cycle and Pathogenesis  
3 The Papanicolaou Smear  
4 Adjunctive Testing  
5 Principles and Technique of the Colposcopic Examination  
6 Normal Transformation Zone  
7 Angiogenesis of Cervical Neoplasia  
8 Abnormal Transformation Zone  
9 Colposcopic Assessment System  
10 Low-Grade Squamous Intraepithelial Lesion  
11 High-Grade Squamous Intraepithelial Lesion  
12 Squamous Cervical Cancer: Invasion and Microinvasion  
13 Colposcopic Features of Cervical Adenocarcinoma in Situ and Adenocarcinoma and Management of Preinvasive Disease  
14 Vagina: Normal, Premalignant, and Malignant  
15 Non-neoplastic Epithelial Lesions of the Vulva  
16 Vulvar Intraepithelial Neoplasia  
17 Vulvar Intraepithelial Neoplasia: Clinical Manifestations  
18 Colposcopy of External Genital Condyloma  
19 Lower Genital Tract Changes Associated with in Utero Exposure to Diethylstilbestrol  
20 Triage of the Abnormal Papanicolaou Smear and Colposcopy in Pregnancy  
21 Lower Genital Tract Intraepithelial Neoplasia in the Immunocompromised Woman  
22 Androscopy: Examination of the Male Partner  
23 Psychosocial Aspects of Colposcopy  
24 Practical Therapeutic Options for Treatment of Cervical Intraepithelial Neoplasia  
25 Management Scenarios  
Index
