<<盆腔疾病Pelvic Floor D>>

内容概要

Internationally known experts offer multidisciplinary guidance on the diagnosis and management of the full spectrum of pelvic floor disorders. It covers the diagnosis and clinical assessment of continence mechanisms and sexual dysfunction, as well as conservative management of the lower urinary tract, disorders of anorectal functions and sexual functions, exploring techniques such as electrical stimulation, anti-incontinence devices, and biofeedback. This valuable text also provides information on the management and treatment of a full range of disorders, from childbirth damage and post-prostatectomy incontinence, to neuropathic voiding dysfunction.
