

<<肺部疾病原理>>

图书基本信息

书名：<<肺部疾病原理>>

13位ISBN编号：9780721695488

10位ISBN编号：0721695485

出版时间：2003-5

出版时间：Elsevier Science Health Science div

作者：Weinberger, Steven E.

页数：403

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The 4th Edition of this comprehensive, thoroughly updated resource correlates basic pathophysiologic principles with the radiologic, pathologic, and clinical aspects of disease to provide an integrated, user-friendly approach to the study of pulmonary medicine. It introduces basic anatomic and physiologic concepts; shows how to recognize and evaluate patients presenting with respiratory disease; and helps the reader to be better prepared to choose the very latest and most effective treatments. Guides the reader through the anatomy, physiology, and pathophysiology relevant to each disease classification to develop a conceptual framework, and then focuses on the clinical aspects and treatment of specific diseases. Highlights key points in margin notes to facilitate review.

Present the relevant physiology for each class of disorders, and then discusses specific diseases within the class.

书籍目录

Introduction
1. Pulmonary Anatomy and Physiology--The Basics
2. Presentation of the Patient with Pulmonary Disease
3. Evaluation of the Patient with Pulmonary Disease
4. Anatomic and Physiologic Aspects of Airways
5. Asthma
6. Chronic Obstructive Pulmonary Disease
7. Miscellaneous Airway Diseases
8. Anatomic and Physiologic Aspects of the Pulmonary Parenchyma
9. Overview of the Diffuse Parenchymal Lung Diseases
10. Diffuse Parenchymal Lung Diseases Associated with Known Etiologic Agents
11. Diffuse Parenchymal Lung Diseases of Unknown Etiology
12. Anatomic and Physiologic Aspects of the Pulmonary Vasculature
13. Pulmonary Embolism
14. Pulmonary Hypertension
15. Pleural Disease
16. Mediastinal Disease
17. Anatomic and Physiologic Aspects of Neural, Muscular, and Chest Wall Interactions with the Lungs
18. Disorders of Ventilatory Control
19. Disorders of the Respiratory Pump
20. Lung Cancer: Etiologic and Pathologic Aspects
21. Lung Cancer: Clinical Aspects
22. Lung Defense Mechanisms
23. Pneumonia
24. Tuberculosis and Nontuberculous Mycobacteria
25. Miscellaneous Infections Due to Fungi and Pneumocystis
26. Acquired Immunodeficiency Syndrome
27. Classification and Pathophysiologic Aspects of Respiratory Failure
28. Acute Respiratory Distress Syndrome
29. Management of Respiratory Failure
Appendix A
Appendix B
Appendix C
Index
