<<Havard护士药物指南>>

内容概要

Havard's Nursing Guide to Drugs, now in its 7th edition, is the essential drug guide for nursing students and practitioners. The information presented in this user-friendly guide can be accessed either by therapeutic class or by body system - each section is introduced by a description of the therapeutic class, followed by an A-Z of drugs within that therapeutic class, including the action, use and dosage of each drug, and important nursing points and nursing cautions. Both trade names and generic drug names are given. A slotted lift-out card contains calculation formulae and selected abbreviations. A systematic update of all drugs allows you to locate all drugs alphabetically or by body system.

作者简介： Adriana Tiziani RN, BSc (Mon), DipEd (Melb), MedSt (Mort), MRCNA

书籍目录
