内容概要

Ashley Ormond's first best-selling book showed you how it's possible to give your kids \$1 million dollars without it costing you a cent. In his new book, \$1 Million For Life, Ashley shows you how you can apply his strategy to your own finances to make yourself a \$1 million, then manage it and maximise it! Ashley's new book is not a get-rich-quick manual -- his strategy for wealth creation is sound and conservative, and involves careful money management to guarantee you a healthy income for the rest of your life. Based on a 5-step plan, which starts with owning your own house and paying it off, the book shares the secrets of maximising the opportunities offered by superannuation, investing outside super, protecting your assets and developing your money sense. The case studies and practical examples included make this road map to financial security easy to follow. \$1 Million For Life will appeal to investors aged 35 to 50 who are income earning and carrying debt, but who are keen to take control of their financial future. 作者简介： Ashley is based in Sydney. He and his wife semi retired in their early 40s and now live off their investments. Ashley has over 20 years in the finance industry and experience working with major Australian and international banking groups.
