<<Microsoft Office Exc>>

内容概要

Experience learning made easy, and quickly teach yourself Microsoft Office Excel 2007 Visual Basic for Applications (VBA)--one step at a time! Work at your own pace through the easy numbered steps and practice files on CD, and master the fundamentals for using VBA to create custom software solutions and automating tasks in Excel 2007--no developer experience required! You'll learn how to automate spreadsheets, write your own functions and procedures, and customize menus and toolbars. You'll discover Excel Objects, including workbooks, range objects, graphics, and PivotTables-. Plus, you'll learn how to chart data from databases and other information sources. With STEP BY STEP, you can take just the lessons you need or work from cover to cover. Either way, you drive the instruction--building and practicing the skills you need, just when you need them! Includes a companion CD with hands-on practice files.

书籍目录
