<<Galileo ' s Daughter伽>>

内容概要

Galileo Galilei was the foremost scientist of his day. Though he never left Italy, his inventions and discoveries were heralded around the world. His telescopes allowed him to reveal the heavens and enforce the astounding argument that the earth moves around the sun. For this belief, he was brought before the Holy Office of the Inquisition, accused of heresy, and forced to spend his last years under house arrest. Galileo's oldest child was thirteen when he placed her in a convent near him in Florence, where she took the most appropriate name of Suor Maria Celeste. Her support was her father's greatest source of strength. Her presence, through letters which Sobel has translated from Italian and masterfully woven into the narrative, graces her father's life now as it did then.

GALILEO'S DAUGHTER dramatically recolors the personality and accomplishment of a mythic figure whose seventeenth-century clash with Catholic doctrine continues to define the schism between science and religion. Moving between Galileo's public life and Maria Celeste's sequestered world, Sobel illuminates the Florence of the Medicis and the papal court in Rome during an era when humanity's perception of its place in the cosmos was overturned. With all the human drama and scientific adventure that distinguished Latitude, GALILEO'S DAUGHTER is an unforgettable story. 作者简介： Dava Sobel is the author of the New York Times bestsellers Longitude and Galileo's Daughter.
