内容概要

A unique expert text of over 50 structured tutorials in clinical ophthalmology, with a further 15 on the enclosed free CD ROM * Ideal as a source of teaching material for the busy lecturer, and as a lecture preparation guide for trainees * Closely aligned to the bestselling reference text, Clinical Ophthalmology, this is an essential revision guide * All of the conditions are illustrated with over 600 new clinical pictures of the highest quality and over 1000 taken from Clinical Ophthalmology 4/e * All of the tutorials are provided in Power Point slide format on the enclosed CD ROM for over-head projection in lectures

CONTENTS: Disorders of lashes; Chronic marginal blepharitis; Diffuse eyelid disease; Benign eyelid lesions; Malignant eyelid tumours; Classification of ptosis; Infections of lacrimal passages; Conjunctival infections; Allergic conjunctivitis; Immunobullous diseases; Conjunctival tumours; Peripheral corneal inflammation; Peripheral corneal thinning and ulceration; Corneal infections; Corneal degenerations; Corneal dystrophies; Corneal ectasias; Congenital corneal anomalies; Corneal surgery; Episcleritis and scleritis; Acquired cataract; Congenital cataract; Complications of cataract surgery; Ectopia lentis; Introduction to glaucoma; Primary open-angle glaucoma; Primary angle - closure glaucoma; Secondary glaucomas; Congenital glaucomas; Important systemic associations of uveitis; Uveal infections and infestations; Idiopathic specific uveitis syndromes; Idiopathic inflammatory white dot syndromes; Uveal tumours; Retinoblastoma; Introduction to retinal detachment; Pathogenesis and signs of retinal detachment; Prophylaxis of rhegmatogenous retinal detachment; Principles of retinal surgery; Fundus angiography; Fundus angiography; Age-related macular degeneration (AMD); Other acquired maculopathies; Drug-related retinopathies; Hereditary retinal dystrophies; Hereditary choroidal dystrophies; Hereditary vitreoretinal degeneration; Diabetic retinopathy; Other retinal vascular disorders; Childhood strabismus; Thyroid eye disease; Orbital infections and inflammations; Vascular orbital disorders; Cystic orbital lesions; Orbital tumours; Optic neuropathies; Papilloedema; Congenital optic nerve anomalies; Supranuclear disorders of eye movement; Ocular motor nerve palsies; Disorders of the chiasm; Phacomatosis; Trauma.

书籍目录

Preface Abbreviations Disorders of lashes Diffuse eyelid disease Benign eyelid lesions Malignant eyelid tumours Ectropion and entropion Ptosis Infections of the lacrimal passages Conjunctival infections Allergic conjunctivitis Immunobullous diseases Conjunctival tumours Peripheral corneal inflammation Peripheral corneal thinning and ulceration Corneal infections Corneal dystrophies Corneal ectasias Episcleritis and scleritis Acquired cataract Congenital cataract Complications of cataract surgery Abnormalities of lens shape Ectopia lentis Introduction to glaucoma Primary open-angle glaucoma Primary angle-closure glaucoma Secondary glaucomas Congenital glaucomas Important systemic associations of uveitis Uveal infections and infestations Idiopathic specific uveitis syndromes Idiopathic inflammatory white dot syndromes Uveal tumours Retinoblastoma Introduction to retinal detachment Pathogenesis and signs of retinal detachment (RD) Prophylaxis of rhegmatogenous retinal detachment Principles of retinal detachment surgery Fundus angiography Age-related macular degeneration (AMD) Other acquired maculopathies Drug-related retinopathies Hereditary retinal dystrophies Hereditary choroidal dystrophies Hereditary vitreoretinal degenerations Diabetic retinopathy Other retinal vascular disorders Childhood strabismus Thyroid eye disease Orbital infections and inflammations Vascular orbital disorders Cystic orbital lesions Orbital tumours Optic neuropathies Papilloedema Congenital optic nerve anomalies Supranuclear disorders of eye movement Ocular motor nerve palsies Disorders of the chiasm Phacomatoses Trauma Index
