内容概要

Follow in the footsteps of our photographers as they lead you on an inspired journey of discovery through some of the most spectacular and remote locations in the world. Forever mesmerizing and mysterious, the Tibetan plateau invites you to experience this unique region so rich in cultural tradition and sacred monuments. Open any of the twelve gatefolds to peer into the lives of these hearty people and marvel at the splendor of their landscape, sacred ritual, and exquisite, but always functional, architecture. To further enhance your experience of TIBET, the book includes a comprehensive index of each location, providing even more cultural and historic background to the text. TIBET showcases the work of a dozen of internationally renowned photographers in this completely original collection of images depicting Tibetan landscapes, history, culture, and people. Each image has been thoughtfully selected for the appropriateness of its subject to the artist's style and technique. TIBET has been printed on quality paper and durably bound with reinforced materials in large format specially chosen to preserve the fine detail and vibrant colors of the originals. TIBET has been simultaneously published in English and French editions by CYIPRESS and CITADELLES&MAZENOD respectively.
