

<<Optimization theory优化理论>>

图书基本信息

书名：<<Optimization theory优化理论>>

13位ISBN编号：9781402080982

10位ISBN编号：1402080980

出版时间：2004-7

出版时间：化学工业出版社

作者：Jongen, H. Th; Jongen, Hubertus; Meer, Klaus

页数：443

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<Optimization theory优>>

内容概要

Optimization Theory is becoming a more and more important mathematical as well as interdisciplinary area, especially in the interplay between mathematics and many other sciences like computer science, physics, engineering, operations research, etc. This volume gives a comprehensive introduction into the theory of (deterministic) optimization on an advanced undergraduate and graduate level. One main feature is the treatment of both continuous and discrete optimization at the same place. This allows to study the problems under different points of view, supporting a better understanding of the entire field. Audience: The book can be adapted well as an introductory textbook into optimization theory on a basis of a two semester course; however, each of its parts can also be taught separately. Many exercises are included to increase the reader's understanding.

书籍目录

Preface I Continuous Optimization 1 Optimality Criteria on Simple Regions 2 Constraints, Lagrange Function, Optimality 3 Parametric Aspects, Semi-Infinite Optimization 4 Convex Functions, Duality, Separation Theorem 5 Linear Inequalities, Constraint Qualifications 6 Linear Programming: The Simplex Method 7 The Ellipsoid Method 8 Karmarkar's Method for Linear Programming 9 Order of Convergence, Steepest Descent 10 Conjugate Direction, Variable Metric 11 Penalty-, Barrier-, Multiplier-, IP-Methods 12 Search Methods without Derivatives 13 One-Dimensional Minimization II Discrete Optimization 14 Graphs and Networks 15 Flows in Networks 16 Applications of the Max-Flow Min-Cut Theorem 17 Integer Linear Programming 18 Computability; the Turing machine 19 Complexity theory 20 Reducibility and NP-completeness 21 Some NP-completeness results 22 The Random Access Machine 23 Complexity Theory over the Real Numbers 24 Approximating NP-hard Problems 25 Approximation Algorithms for TSP 26 Approximation algorithms for Bin Packing 27 A FPTAS for Knapsack 28 Miscellaneous Index Index of Symbols References
