<<Fighter 历史上的勇士>>

内容概要

For all of us living in the 21st century, the age-old dream of flight was realized long ago. It is probably only those men and women who find themselves sitting in the cockpit of a fighter who are still able to experience any sense of aviation as a great adventure.

Their elegant, dynamic fighters are worlds apart from the stolid airliners we are all so familiar with. They have the power to captivate even the most peace-loving individuals. This fascination is timeless and just as true of the eccentric-looking "flying crates" of 1914, constructed of wire, wood and fabric, as of the technological marvels bristling with weapons of today.

Come with us on a journey into a world of brilliant designers and daring pilots-the world of the fighter past and present.

<<Fighter 历史上的勇士>>
