<<足踝病例精粹Foot and Ank>>

内容概要

This book comprises 70 patient cases, examining foot and ankle disorders in the successful format of The Pearls Series®. A detailed clinical vignette, accompanied by a photo or radiograph, is presented. The reader is encouraged to consider a differential diagnosis and formulate a plan for diagnosis and treatment. The subsequent pages reveal the diagnosis and the method by which it was reached, and discuss the patient's course. Each case concludes with three or four clinical pearls.

书籍目录

Patient1. A 43-year-old woman with a painful and swollen great toe2. A 43-year-old man with constant heel pain3. A 24-year-old man with a crushed foot4.
