

<<Bast and other plant>>

图书基本信息

书名：<<Bast and other plant fibres韧皮纤维和其他植物纤维>>

13位ISBN编号：9781855736849

10位ISBN编号：1855736845

出版时间：2005-4

作者：Franck, Robert

页数：397

<<Bast and other plant>>

内容概要

Environmental concerns have regenerated interest in the use of natural fibers for a much wider variety of products , including high-tech applications such as geotextiles , and composite materials for automotive and light industry use.

Covering minor as well as major fibers produced worldwide , Bast and Other Plant Fibers analyzes flax , hemp , jute , kenaf , ramie , sisal , coir , and nettle , and provides an index of fiber-yielding plants.

Each chapter examining chemical and physical structure , fiber , yarn and fabric production , dyeing , handle and wear characteristics , economics , and environmental , health and safety issues.

A comprehensive set of tables makes it easy to compare the physical and chemical characteristics of different fibers

。

书籍目录

List of figures List of tables About the editor About the contributors Contributor contact details Acknowledgements 1
 Overview 1.1 Introduction 1.2 Fibre prices 1.3 The Food and Agricultural Organisation's statistics
 (www//FAOstat) 1.4 Comparative data on the physical and chemical characteristics of bast and leaf fibres
 1.5 Appendix: Comparative physical , chemical and morphological characteristics of certain fibres 1.6
 References 2 Jute 2.1 Introduction 2.2 Fibre production and early processing 2.3 Physical and
 chemical properties 2.4 Yarn production 2.5 Fabric producing , end-uses and specifications 2.6
 Dyeing and finishing: modern developments in chemical finishing 2.7 Economic and cost considerations
 2.8 Market development 2.9 Environmental considerations 2.10 Health and safety considerations
 2.11 Acknowledgements 2.12 Appendices A Jute ' S allied fibres : kenaf roselle and urena B Jute
 world fibre production C Recent developments in retting methods D Non—textile uses of jute E Jute testing
 instruments developed by SITRA 2.13 Bibliography 2.14 References 2.15 Glossary of terms 3 Flax 3.1
 Introduction 3.2 The flax plant 3.3 Physical and chemical characteristics of flax fibres 3.4 Cultivation
 and harvesting 3.5 Scutching 3.6 Yarn preparation and spinning 3.7 Weaving 3.8 Knitting 3.9 Fabric
 design , bleaching , dyeing and finishing 3.10 Apparel manufacture 3.11 Products and applications
 3.12 Economic and cost considerations 3.13 Marketing 3.14 Environmental and health and safety
 considerations 3.15 Conclusion and future trends 3.16 Appendices A Comparison of flax fibre yield in
 various countries B World cotton production C Flax cultivars—textile flax varieties approved by the
 European Union D Relationships between different common yarn count systems E The European Union
 ' S flax subsidy scheme (2003) F Contractual relationships between flax growers and their customers in
 France 4 Hemp 5 Ramie 6 Sisal 7 Coir 8 Abaca 9 pineapple , curaua , craua (caroa) , macambira , nettle
 sunn hemp , Mauritius hemp and fique 10 Bast and leaf fibre composite materials
