<<肢体与躯干体表解剖图谱 Atlas of>>

内容概要

This one-of-a-kind, authoritative text makes palpatory anatomy - the manual investigation of surface forms - come alive. Nearly 70 Netter illustrations and over 700 photographs demonstrate how to identify different anatomical structures (bones, ligaments, tendons, muscles, and nerves) via palpation. Each section begins with a series of relevant Netter illustrations, followed by detailed photographs, illustrations, and descriptions of gross anatomical structures, regions, topography, and musculature and innervation.
