<<翠玉录\亡灵书\翡翠碑文>>

内容概要

Benjamin and his best friend Andy love being different from the other kids. They like being able to read each others minds and use their telekinesis to play tricks. In fact, they are getting set to spend their entire summer doing just that when Benjamin's mirror starts talking. Suddenly, he's looking at eight weeks of summer school someplace that can only be reached by a teleporter hidden in his hallway. And the summer only gets stranger.

At school, Benjamin discovers that he isn't really human but something called a telegen. It turns out that the powers he always thought made him special only make him normal. But then the mysterious Emerald Tablet chooses him as its champion, and all chances of a uneventful (well, as uneventful as summer school on a hidden, submerged continent can be) disappears.
