<<CASL Reference Manua>>

图书基本信息

书名: <<CASL Reference ManualCASL参考手册>>

13位ISBN编号: 9783540213017

10位ISBN编号: 3540213015

出版时间:2004-4

出版时间:北京燕山出版社

作者: Mosses, Peter D. 编

页数:528

版权说明:本站所提供下载的PDF图书仅提供预览和简介,请支持正版图书。

<<CASL Reference Manua>>

内容概要

CASL, the Common Algebraic Specification Language, was designed by the members of CoFI, the Common Framework Initiative for algebraic specification and development, and is a general-purpose language for practical use in software development for specifying both requirements and design. CASL is already regarded as a de facto standard, and various sublanguages and extensions are available for specific tasks. This reference manual presents a detailed documentation of the CASL specification formalism. It reviews the main underlying concepts, and carefully summarizes the intended meaning of each construct of CASL. The book formally defines both the syntax and semantics of CASL, and presents a logic for reasoning about CASL specifications. Furthermore, extensive libraries of CASL specifications of basic data types are provided as well as a comprehensive annotated bibliography of CoFI publications. As a separate, complementary book LNCS 2900 presents a tutorial introduction to CASL, the CASL User Manual.
