<<Principles and Pract>>

内容概要

This book constitutes the refereed proceedings of the Third International Workshop on Principles and Practice of Semantic Web Reasoning, PPSWR 2005, held in Dagstuhl Castle, Germany in September 2005. The 12 revised full papers presented together with 3 invited contributions were carefully reviewed and selected for inclusion in the book. The major aspects of semantic Web research are addressed in the papers, namely semantic Web architectures, language issues, and formal reasoning methods. The advances are investigated in the context of new design principles and challenging applications.

书籍目录

Architectures SomeWhere in the Semantic Web A Framework for Aligning Ontologies A Revised
Architecture for Semantic Web Reasoning Semantic Web Architecture: Stack or Two Towers?Languages Ten
Theses on Logic Languages for the Semantic Web (Invited Talk) Semantic and Computational Advantages of the
Safe Integration of Ontologies and Rules Logical Reconstruction of RDF and Ontology Languages Marriages
of Convenience: Triples and Graphs, RDF and XML in Web Querying Descriptive Typing Rules for Xcerpt
A General Language for Evolution and Reactivity in the Semantic WebReasoning Use Cases for Reasoning
with Metadata or What Have Web Services to Do with Integrity Constraints? Principles of Inductive Reasoning
on the Semantic Web: A Framework for Learning in AC-Log Computational Treatment of Temporal Notions:
The CTTN-System A Geospatial World Model for the Semantic Web - A Position Paper Generating Contexts
for Expression Data Using Pathway QueriesAuthor Index
