

<<Logic for Programmin>>

图书基本信息

书名：<<Logic for Programming, Artificial Intelligence, and Reasoning编程、人工智能与推理用逻辑学>>

13位ISBN编号：9783540305538

10位ISBN编号：354030553X

出版时间：2006-1

出版时间：湖北辞书出版社

作者：Geoff Sutcliffe

页数：742

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<Logic for Programmin>>

### 内容概要

This book constitutes the refereed proceedings of the 12th International Conference on Logic for Programming, Artificial Intelligence, and Reasoning, LPAR 2005, held in Montego Bay, Jamaica in December 2005. The 46 revised full papers presented together with abstracts of 3 invited talks were carefully reviewed and selected from 108 full paper submissions. The papers address all current issues in logic programming, logic-based program manipulation, formal method, automated reasoning, and various kinds of AI logics.

<<Logic for Programmin>>

书籍目录

Independently Checkable Proofs from Decision Procedures: Issues and Progress  
 Zap: Automated Theorem Proving for Software Analysis  
 Decision Procedures for SAT, SAT Modulo Theories and Beyond The Barcelo  
 Tools  
 Scaling Up: Computers vs. Common Sense  
 A New Constraint Solver for 3D Lattices and Its Application to the Protein Folding Problem  
 Disjunctive Constraint Lambda Calculi  
 Computational Issues in Exploiting Dependent And-Parallelism in Logic Programming: Leftness Detection in Dynamic Search Trees  
 The nomore++ Approach to Answer Set Solving  
 Optimizing the Runtime Processing of Types in Polymorphic Logic Programming Languages  
 The Four Sons of Penrose  
 An Algorithmic Account of Ehrenfeucht Games on Labeled Successor Structures  
 Second-Order Principles in Specification Languages for Object-Oriented Programs  
 Strong Normalization of the Dual Classical Sequent Calculus  
 Termination of Fair Computations in Term Rewriting  
 Confluence of Infinitary Combinatory Reduction Systems  
 Matching with Regular Constraints  
 Recursive Path Orderings Can Also Be Incremental  
 Automating Coherent Logic  
 The Theorema Environment for Interactive Proof Development  
 A First Order Extension of Stmarck's Method  
 Regular Derivations in Basic Superposition-Based Calculi  
 On the Finite Satisfiability Problem for the Guarded Fragment with Transitivity  
 Deciding Separation Logic Formulae by SAT and Incremental Negative Cycle Elimination  
 Monotone AC-Tree Automata  
 On the Specification of Sequent Systems.....  
 Author Index
