## 内容概要

The LNCS series reports state-of-the-art results in computer science research , development , and education , at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community , with numerous individuals , as well as with prestigious organizations and societies , LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS , including its subseries LNAI , spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes. —proceedings ( published in time for the respective conference ) —post-proceedings ( consisting of thoroughly revised final full papers ) —research monographs ( which may be based on outstanding PhD work , research projects , technical reports , etc. ) .
