

<<语义网推理的原理与实践>>

图书基本信息

书名：<<语义网推理的原理与实践>>

13位ISBN编号：9783540395867

10位ISBN编号：3540395865

出版时间：2006-12

出版时间：湖北辞书出版社

作者：Alferes, Jose Julio; Bailey, James; May, Wolfgang

页数：275

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<语义网推理的原理与实践>>

内容概要

This book constitutes the refereed proceedings of the 4th International Workshop on Principles and Practice of Semantic Web Reasoning, PPSWR 2006, held in Budva, Montenegro in June 2006 as a satellite event of the 3rd Annual European Semantic Web Conference, ESWC 2006. The 14 revised full papers presented together with 1 invited talk and 6 system demonstrations were carefully reviewed and selected from 25 submissions. The major aspects of semantic Web research are addressed in the papers, namely various forms of reasoning with a strong interest in rule-based languages and methods - ranging from more theoretical work on reasoning methods that can be applied to the semantic Web, concrete reasoning methods and query languages for the semantic Web, to practical applications.

<<语义网推理的原理与实践>>

书籍目录

Session 1. Invited Talk The RuleML Family of Web Rule Languages
Session 2. Reasoning I Automated Reasoning Support for First-Order Ontologies Combining Safe Rules and Ontologies by Interfacing of Reasoners
Session 3. Applications Realizing Business Processes with ECA Rules: Benefits, Challenges, Limits Interaction Protocols and Capabilities: A Preliminary Report Semantic Web Reasoning for Analyzing Gene Expression Profiles
Session 4. Querying Data Model and Query Constructs for Versatile Web Query Languages State-of-the-Art and Challenges for Xcerpt AMhxoS--Abstract Machine for Xcerpt: Architecture and Principles Towards More Precise Typing Rules for Xcerpt.
Session 5. Reasoning II Extending an OWL Web Node with Reactive Behavior Supporting Open and Closed World Reasoning on the Web Reasoning with Temporal Constraints in RDF
Session 6. Reasoning III Bidirectional Mapping Between OWL DL and Attempto Controlled English XML Querying Using Ontological Information Semantic Web Reasoning Using a Blackboard System
Systems Session Effective and Efficient Data Access in the Versatile Web Query Language Xcerpt Web Queries with Style: Rendering Xcerpt Programs with CSSNG Information Gathering in a Dynamic World Practice of Inductive Reasoning on the Semantic Web: A System for Semantic Web Mining
