<<Graph colouring and >>

内容概要

Over the past decade, many major advances have been made in the field of graph colouring via the probabilistic method. This monograph provides an accessible and unified treatment of these results, using tools such as the Lovasz Local Lemma and Talagrand's concentration inequality. The topics covered include: Kahn's proofs that the Goldberg-Seymour and List Colouring Conjectures hold asymptotically; a proof that for some absolute constant C , every graph of maximum degree Δ has a $\Delta+C$ total colouring; Johansson's proof that a triangle free graph has a $O(\Delta / \log \Delta)$ colouring; algorithmic variants of the Local Lemma which permit the efficient construction of many optimal and near-optimal colourings. This begins with a gentle introduction to the probabilistic method and will be useful to researchers and graduate students in graph theory, discrete mathematics, theoretical computer science and probability.

书籍目录

Part I Preliminaries 1 Colouring Preliminaries 2 Probabilistic Preliminaries Part II Basic Probabilistic Tools
3 The First Moment Method 4 The Lovasz Local Lemma 5 The Chernoff Bound Part III Vertex Partitions
6 Hadwiger's Conjecture 7 A First Glimpse of Total Colouring 8 The Strong Chromatic Number 9 Total
Colouring Revisited Part IV A Naive Colouring Procedure 10 Talagrand's Inequality and Colouring Sparse
Graphs 11 Azuma's Inequality and a Strengthening of Brooks' Theorem Part V An Iterative Approach 12
Graphs with Girth at Least Five 13 Triangle-Free Graphs 14 The List Colouring Conjecture Part VI A
Structural Decomposition 15 The Structural Decomposition 16 $[\omega]$, $[\Delta]$ and $[\chi]$ 17 Near
Optimal Total Colouring I: Sparse Graphs 18 Near Optimal Total Colouring II: General Graphs Part VII
Sharpening our Tools 19 Generalizations of the Local Lemma 20 A Closer Look at Talagrand's Inequality
Part VIII Colour Assignment via Fractional Colouring 21 Finding Fractional Colourings and Large Stable Sets
22 Hard-Core Distributions on Matchings 23 The Asymptotics of Edge Colouring Multigraphs Part IX
Algorithmic Aspects 24 The Method of Conditional Expectations 25 Algorithmic Aspects of the Local
Lemma References Index
