

<<整数编程与组合优化/Integer p>>

图书基本信息

书名：<<整数编程与组合优化/Integer programming and combinatorial optimization>>

13位ISBN编号：9783540436768

10位ISBN编号：3540436766

出版时间：2002-12

出版时间：1 edition (2002年6月1日)

作者：William J. Cook

页数：486

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<整数编程与组合优化/Integer p>>

内容概要

This book constitutes the refereed proceedings of the 9th International Conference on Integer Programming and Combinatorial Optimization, IPCO 2002, held in Cambridge, MA, USA, in May 2002. The 33 revised full papers presented were carefully reviewed and selected from a total of 110 submissions. Among the topics covered are scaling algorithms, flow algorithms, combinatorial optimization algorithms, approximate TSP solutions, graph computations, algorithmic geometry, mixed integer programming, network design, logistic scheduling, constraint solving, resource allocation, matching algorithms, and matroid intersection algorithms.

书籍目录

A Faster Scaling Algorithm for Minimizing Submodular Functions  
 A Generalization of Edmonds' Matching and Matroid Intersection Algorithms  
 A Coordinatewise Domain Scaling Algorithm for M-convex Function Minimization  
 The Quickest Multicommodity Flow Problem  
 A New Min-Cut Max-Flow Ratio for Multicommodity Flows  
 Improved Rounding Techniques for the MAX 2-SAT and MAX DI-CUT Problems  
 Finding the Exact Integrality Gap for Small Traveling Salesman Problems  
 Polynomial-Time Separation of Simple Comb Inequalities  
 A New Approach to Cactus Construction Applied to TSP Support Graphs  
 Split Closure and Intersection Cuts  
 An Exponential Lower Bound on the Length of Some Classes of Branch-and-Cut Proofs  
 Lifted Inequalities for 0-1 Mixed Integer Programming: Basic Theory and Algorithms  
 On a Lemma of Scarf  
 A Short Proof of Seymour's Characterization of the Matroids with the Max-Flow Min-Cut Property  
 Integer Programming and Arrovian Social Welfare Functions  
 Integrated Logistics: Approximation Algorithms Combining Facility Location and Network Design  
 The Minimum Latency Problem Is NP-Hard for Weighted Trees  
 An Improved Approximation Algorithm for the Metric Uncapacitated Facility Location Problem  
 A Polyhedral Approach to Surface Reconstruction from Planar Contours  
 The Semidefinite Relaxation of the k-Partition Polytope Is Strong  
 A Polyhedral Study of the Cardinality Constrained Knapsack Problem  
 A PTAS for Minimizing Total Completion Time of Bounded Batch Scheduling  
 An Approximation Scheme for the Two-Stage, Two-Dimensional Bin Packing Problem  
 On Preemptive Resource Constrained Scheduling: Polynomial-Time Approximation Schemes  
 Hard Equality Constrained Integer Knapsacks  
 The Distribution of Values in the Quadratic Assignment Problem  
 A New Subadditive Approach to Integer Programming.....  
 Author Index
