内容概要

This book constitutes the thoroughly refereed post-proceedings of the International Workshop on Security and Privacy in Digital Rights Management, DRM 2001, held during the ACM CCS-8 Conference in Philadelphia, PA, USA, in November 2001. The 14 revised full papers presented were carefully reviewed and selected from 50 submissions. The papers are organized in topical sections on renewability, fuzzy hashing, cryptographic techniques and fingerprinting, privacy and architectures, software tamper resistance, cryptanalysis, and economic and legal aspects.

书籍目录

Renewability Discouraging Software Piracy Using Software Aging Fuzzy Hashing New Iterative Geometric Methods for Robust Perceptual Image Hashing Cryptographic Techniques, Fingerprinting On Crafty Pirates and Foxy Tracers Efficient State Updates for Key Management Collusion Secure q-ary Fingerprinting for Perceptual Content Privacy, Architectures Privacy Engineering for Digital Rights Management Systems Secure Open Systems for Protecting Privacy and Digital Services MPEG-4 IPMP Extensions Software Tamper Resistance Dynamic Self-Checking Techniques for Improved Tamper Resistance Protecting Software Code by Guards How to Manage Persistent State in DRM Systems Cryptanalysis A Cryptanalysis of the High-Bandwidth Digital Content Protection System Economics, Legal Aspects Implications of Digital Rights Management for Online Music-A Business Perspective From Copyright to Information Law - Implications of Digital Rights Management Taking the Copy Out of Copyright Author Index
