

图书基本信息

书名：<<佩特里网应用与理论2002/会议录 Application and theory of petri nets 2002>>

13位ISBN编号：9783540437871

10位ISBN编号：3540437878

出版时间：2002-12

出版时间：1 edition (2002年8月1日)

作者：Javier Esparza

页数：444

内容概要

This book constitutes the refereed proceedings of the 23rd International Conference on Application and Theory of Petri Nets, ICATPN 2002, held in Adelaide, Australia, in June 2002. The 18 regular papers and one tool presentation presented together with six invited paper were carefully reviewed and selected from 45 submissions. All current issues on research and development of Petri nets are addressed, in particular concurrent systems analysis, model validation, business process management, reactive systems, workflow processes, wireless transaction protocols.

书籍目录

Invited Papers Making Work Flow: On the Application of Petri Nets to Business Process Management
Model Validation - A Theoretical Issue? The Real-Time Refinement Calculus: A Foundation for
Machine-Independent Real-Time Progr The Challenge of Object Orientation for the Analysis of Concurrent
Systems Abstract Cyclic Communicating Processes: A Logical View Is the Die Cast for the Token
Game?Regular Papers Quasi-Static Scheduling of Independent Tasks for Reactive Systems Data Decision
Diagrams for Petri Net Analysis Non-controllable Choice Robustness Expressing the Controllability of
Workflow Processes Real-Time Synchronised Petri Nets Computing a Finite Prefix of a Time Petri Net
Verification of a Revised WAP Wireless Transaction Protocol Characterizing Liveness of Petri Nets in Terms
of Siphons Petri Nets, Situations, and Automata Reproducibility of the Empty Marking Modeling and
Analysis of Multi-class Threshold-Based Queues with Hysteresis Using Stochastic Petri Nets Tackling the
Infinite State Space of a Multimedia Control Protocol Service Specification Modelling of Features and Feature
Interactions in Nokia Mobile Phones Using Coloured Petri Nets Analysing Infinite-State Systems by
Combining Equivalence Reduction and the Sweep-Line Method Regular Event Structures and Finite Petri Nets:
The Conflict-Free Case A Formal Service Specification for the Internet Open Trading Protocol Transition
Refinement for Deriving a Distributed Minimum Weight Spanning Tree Algorithm Token-Controlled Place
Refinement in Hierarchical Petri Nets with Application to Active Document Workflow Translating TPAL
Specifications into Timed-Arc Petri Nets Tool Presentation Maria: Modular Reachability Analyser for
Algebraic System NetsAuthor Index
