

<<多分类器系统 Multiple clas>>

图书基本信息

书名：<<多分类器系统 Multiple classifier systems>>

13位ISBN编号：9783540438182

10位ISBN编号：3540438181

出版时间：2002-12

出版时间：1 edition (2002年8月1日)

作者：Fabio Roli

页数：335

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<多分类器系统 Multiple clas>>

### 内容概要

This book constitutes the refereed proceedings of the Third International Workshop on Multiple Classifier Systems, MCS 2002, held in Cagliari, Italy, in June 2002. The 29 revised full papers presented together with three invited papers were carefully reviewed and selected for inclusion in the volume. The papers are organized in topical sections on bagging and boosting, ensemble learning and neural networks, design methodologies, combination strategies, analysis and performance evaluation, and applications.

<<多分类器系统 Multiple clas>>

书籍目录

Invited Papers    Multiclassifier Systems: Back to the ~ture    Support Vector Machines, Kernel Logistic Regression and Boosting    Multiple Classification Systems in the Context of Feature Extraction and Selection Bagging and Boosting    Boosted Tree Ensembles for Solving Multiclass Problems    Distributed Pasting of Small Votes  
    Bagging and Boosting for the Nearest Mean Classifier: Effects of Sample Size on Diversity and Accuracy  
    Highlighting Hard Patterns via Adaboost Weights Evolution    Using Diversity with Three Variants of Boosting: Aggressive, Conservative, and Inverse Ensemble Learning and Neural Networks Multistage Neural Network Ensembles    Forward and Backward Selection in Regression Hybrid Network    Types of Multinet System  
    Discriminant Analysis and Factorial Multiple Splits in Recursive Partitioning for Data Mining Design Methodologies    New Measure of Classifier Dependency in Multiple Classifier Systems    A Discussion on the Classifier Projection Space for Classifier Combining    On the General Application of the Tomographic Classifier Fusion Methodology    Post-processing of Classifier Outputs in Multiple Classifier Systems Combination Strategies  
    Trainable Multiple Classifier Schemes for Handwritten Character Recognition    Generating Classifiers Ensembles from Multiple Prototypes and Its Application to Handwriting Recognition    Adaptive Feature Spaces for Land Cover Classification with Limited Ground Truth    Stacking with Multi-response Model Trees  
    On Combining One-Class Classifiers for Image Database Retrieval Analysis and Performance Evaluation  
    Bias-Variance Analysis and Ensembles of SVM    An Experimental Comparison of Fixed and Trained Rules for Crisp Classifiers Outputs.....Applications Author Index
