

<<机器学习>>

图书基本信息

书名：<<机器学习>>

13位ISBN编号：9783540440369

10位ISBN编号：3540440364

出版时间：2002-09-17

出版时间：Springer

作者：Tapio Elomaa

页数：528

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The LNAI series reports state-of-the-art results in artificial intelligence re-search , development , and education , at a high level and in both printed and electronic form. Enjoying tight cooperation with the R & D community , with numerous individuals , as well as with prestigious organizations and societies , LNAI has grown into the most comprehensive artificial intelligence research forum available. The scope of LNAI spans the whole range of artificial intelligence and intelli-gent information processing including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes proceedings (published in time for the respective conference) post-proceedings (consisting of thoroughly revised final full papers) research monographs (which may be based on PhD work)

书籍目录

Contributed Papers
Convergent Gradient Ascent in General-Sum Games
Revising Engineering Models: Combining Computational Discovery
Variational Extensions to EM and Multinomial PCA
Learning and Inference for Clause Identification
An Empirical Study of Encoding Schemes and Search Strategies in Discovering Causal Networks
Variance Optimized Bagging
How to Make AdaBoost.M1 Work for Weak Base Classifiers
Sparse Online Greedy Support Vector Regression
Pairwise Classification as an Ensemble Technique
RIONA: A Classifier Combining Rule Induction and k-NN Method with Automated Selection of Optimal Neighbourhood
Using Hard Classifiers to Estimate Conditional Class Probabilities
Evidence that Incremental Delta-Bar-Delta Is an Attribute-Efficient Linear Learner
Scaling Boosting by Margin-Based Inclusion of Features and Relations
Multiclass Alternating Decision Trees
Possibilistic Induction in Decision-Tree Learning
Improved Smoothing for Probabilistic Suffix Trees Seen as Variable Order Markov Chains
Collaborative Learning of Term-Based Concepts for Automatic Query Expansion
Learning to Play a Highly Complex Game from Human Expert Games
Reliable Classifications with Machine Learning
Matjaž Kukar and Igor Kononenko
Robustness Analyses of Instance-Based Collaborative Recommendation
iBoost: Boosting Using an instance-Based Exponential Weighting Scheme
Towards a Simple Clustering Criterion Based on Minimum Length Encoding
Class Probability Estimation and Cost-Sensitive Classification Decisions
On-Line Support Vector Machine Regression
Q-Cut - Dynamic Discovery of Sub-goals in Reinforcement Learning
A Multistrategy Approach to the Classification of Phases in Business Cycles
A Robust Boosting Algorithm
Case Exchange Strategies in Multiagent Learning
Inductive Confidence Machines for Regression
Macro-Operators in Multirelational Learning
A Search-Space Reduction Technique.....Invited Papers
Author Index
