内容概要

The LNCS series reports state-of-the-art results in computer science research , development , and education , at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community , with numerous individuals , as well as with prestigious organizations and societies , LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS , including its subseries LNAI , spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes. —proceedings (published in time for the respective conference) —post-proceedings (consisting of thoroughly revised final full papers) —research monographs (which may be based on outstanding PhD work , research projects , technical reports , etc.) .

书籍目录

Invited Talks Corporate Semantic Webs A Framework for Defining E-business Models GRID in E-business
The Latest Development on Cognitive InformaticsDevelopping Web Services Pluggable Services for Tailorable
E-content Delivery An Object-Oriented Approach for Designing Administrative E-form,and Transactional
E-services Trust Objects in Electronic Commerce TransactionsObject Databases OODBMS Metamodel
Supporting Configuration Management of Large Applications Generic Applications for Object-Oriented
Databases Validated Cost Models for Parallel OQL Query Processing Sandra de F. Mendes Sampaio, Norman
W. An Object-Oriented Schema for Querying AudioXML and Web Supporting Web Development in the
OPEN Process: Additional Roles and Techniques Semantic Integration of Heterogeneous XML Data Sources
F2/XML: Storing XML Documents in Object Databases Customization Policies Need more than Rule
ObjectsComponent and Ontology Using Meta-patterns to Construct Patterns A Tool and a Formalism to
Design and Apply Patterns A Support System for Reuse Knowledge Components Object Oriented Design
Knowledge: Ontology and Measurement of Impact Generating Domain Models from OntologiesUML
Modelling A Framework to Review Complex Experimental Knowledge A Framework to Translate UML Class
Generalization into Java Code UML Aspect Specification Using Role Models Generic XMI-Based UML
Model Transformations A UML Variant for Modeling System SearchabilityObject Modeling and Information
Systems AdaptionE-business Models and WorkflowPerformance and Method EvaluationProgramming and
TestsSoftware Engineering MetricsWeb-Based Information SystemsArchitecture and CorbaRoles and Evolvable
