

图书基本信息

书名：<<因特网上多媒体的管理 / 会议录Management of multimedia on the Internet>>

13位ISBN编号：9783540442714

10位ISBN编号：3540442715

出版时间：2002-11-11

出版时间：Springer

作者：Schulte-Mater, Anne M.; Almeroth, K. C.; Almeroth, Kevin C.

页数：356

内容概要

This book constitutes the refereed proceedings of the 5th IFIP/IEEE International Conference on the Management of Multimedia Networks and Services, MMNS 2002, held in Santa Barbara, CA, USA, in October 2002. The 27 revised full papers presented were carefully reviewed and selected from a total of 76 submissions. The papers are organized in topical sections on service management, management of wireless multimedia, bandwidth sharing protocols, distributed video architectures, management systems, differentiated network services, user level traffic adaptation, and multicast congestion control.

书籍目录

Service Management A QoS Network Management System for Robust and Reliable Multimedia Services
Federated Accounting Management System Architecture for Multimedia Service Usage Management
Policy-Based Quality of Service and Security Management for Multimedia Services on IP Networks in the
RTIPA Project Formal Modeling of Service Session Management Management of Wireless Multimedia
Network Requirement for Management of Multimedia over Wireless Channel Agile Systems Manager for
Enterprise Wireless Networks System Performance of HiperLAN/2 Bandwidth Sharing Protocols Streaming
Media Congestion Control Using Bandwidth Estimation Signaling Protocol for Session-Aware Popularity-Based
Resource Allocation Distributed Video Architectures A Scalable Video Server Using Intelligent Network
Attached Storage On Proxy-Caching Mechanisms for Cooperative Video Streaming in Heterogeneous
Environments Management Systems Using CORBA's Advanced Services to Enhance the Integrity of QoS
Management Programmable Networks Remote Multicast Monitoring Using the RTP MIB Active Technology
as an Efficient Approach to Control DiffServ Networks The DACA Architecture Efficient Implementation of
Packet Scheduling Algorithm on High-Speed Programmable Network Processors Differentiated Network
Services Distributed Dynamic Capacity Contracting: A Congestion Pricing Framework for Diff-Serv Fair
Stateless Aggregate Traffic Marking Using Active Queue Management Techniques A Dynamic Marking
Scheme of Assured Service for Alleviating Unfairness among Service Level Agreements..... User Level Traffic
Adaptation Multicast Congestion Control Author Index
