

<<`约束程序设计原理与实践/Princi>>

图书基本信息

书名：<<`约束程序设计原理与实践/Principles and practice>>

13位ISBN编号：9783540462675

10位ISBN编号：3540462678

出版时间：2006-12

出版时间：湖南文艺出版社

作者：Benhamou, Fridiric; Benhamou, Fr D. Ric; Benhamou, Frederic

页数：774

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS, including its subseries LNAI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes: -proceedings (published in time for the respective conference) -post-proceedings (consisting of thoroughly revised final full papers) -research monographs (which may be based on outstanding PhD work, research projects, technical reports, etc.).

书籍目录

Invited Papers Global Optimization of Probabilistically Constrained Linear Programs Algorithms and
Constraint Programming Interval Analysis and Robotics Constraint Based Resilience AnalysisRegular Papers
Infinite Qualitative Simulations by Means of Constraint Programming Algorithms for Stochastic CSPs
Graph Properties Based Filtering The ROOTS Constraint Co Java: Optimization Modeling by
Nondeterministic Simulation An Algebraic Characterisation of Complexity for Valued Constraints Typed
Guarded Decompositions for Constraint Satisfaction The Minimum Spanning Tree Constraint Impact of
Censored Sampling on the Performance of Restart Strategies Watched Literals for Constraint Propagation in
Minion Inner and Outer Approximations of Existentially Quantified Equality Constraints Performance
Prediction and Automated Tuning of Randomized and Parametric Algorithms Adaptive Clause Weight
Redistribution Localization of an Underwater Robot Using Interval Constraint Propagation Approximability
of Integer Programming with Generalised Constraints When Constraint Programming and Local Search Solve
the Scheduling Problem of Electricite de France Nuclear Power Plant Outages Generalized Arc Consistency
for Positive Table ConstraintsPoster Papers Author Index
