

<<食管彩超与术中成像图谱 Atlas of>>

图书基本信息

书名：<<食管彩超与术中成像图谱 Atlas of Transesophageal Color Doppler Echocardiography and Intraoperative Imaging>>

13位ISBN编号：9783540579380

10位ISBN编号：3540579389

出版时间：1995年01月

出版时间：Springer

作者：Raffaele De Simone

页数：204

## 内容概要

Atlas of Transesophageal Color Doppler Echocardiography and Intraoperative Imaging Transesophageal color Doppler echocardiography (TEE) has revolutionized the diagnostic approach to heart disease. The enhanced image quality and improved visualization of intracardiac flow makes TEE an indispensable technique for diagnosis and treatment. This Atlas describes a wide range of heart diseases selected from perioperative examinations performed at the Department of Cardiac Surgery of the University of Heidelberg, Germany.

This Atlas of TEE is more than an introduction to this new technique: it represents a manual of heart pathology described through TEE examinations and provides cardiologists, cardiac surgeons, and all physicians involved in the management of heart disease with an extraordinary tool for the diagnosis of a wide range of heart disease.

This Atlas is also available as an electronic book: "Interactive Atlas of TEE" published on CD-ROM by Springer-Verlag. The present book includes a diskette which contains a reduced version of the CD-ROM. With this program the reader can visualize the transversal and the longitudinal TEE standard views in their spatial orientations.

书籍目录

1 Techniques Intraoperative Echocardiography Clinical Applications Transesophageal Approach Epicardial Approach Two-Dimensional TEE Monoplanar Imaging Biplanar Imaging Color Doppler Flow Imaging Basics Normal Flow Abnormal Flow 2 Acquired Heart Disease Valvular Heart Disease Mitral Valve Aortic Valve Tricuspid Valve Pulmonary Valve Prosthetic Valves Endocarditis Coronary Artery Disease Aortic Dissection Cardiac Tumors Myxoma Hemangioma Sarcoma Extracardiac Tumors. Left Ventricular Aneurysm Cardiomyopathies Dilated Cardiomyopathy Hypertrophic Obstructive Cardiomyopathy Restrictive Cardiomyopathy Pericardial Effusion 3 Congenital Heart Disease Atrial Septal Defects Patent Foramen Ovale Ostium Secundum ASD Ostium Primum ASD Sinus Venosus ASD Atrial Septal Aneurysm Cor Triatriatum Atrioventricular Septal Defects Partial AVSD Complete AVSD Ventricular Septal Defects Single Ventricle Tetralogy of Fallot Double Outlet Right Ventricle Dextrocardia Transposition of the Great Arteries Noncorrected TGA Congenitally Corrected TGA Truncus Arteriosus Congenital Pulmonary Stenosis Infundibular Stenosis Pulmonary Valve Stenosis Banding of the Pulmonary Artery Congenital Aortic Stenosis Subvalvular Stenosis Aortic Valve Stenosis Supravalvular Stenosis Coarctation of the Aorta Ebstein's Anomaly 4 Other Applications of TEE Left Ventricular Function Heart Transplantation Dynamic Cardiomyoplasty Bibliography Appendix Subject Index
