

<<黎曼几何>>

图书基本信息

书名：<<黎曼几何>>

13位ISBN编号：9787030182944

10位ISBN编号：7030182944

出版时间：2007-1

出版时间：科学

作者：彼得森

页数：401

字数：494000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<黎曼几何>>

### 内容概要

本书介绍黎曼几何中的重要技巧和定理，为满足那些希望专门研究黎曼几何的学生，书中还包含大量关于较深论题的背景材料。

本书还介绍了最新的研究问题。

各种练习散布全书，帮助读者深入理解书中内容。

本书是为数不多的整合了黎曼几何的几何和分析两方面内容的专著之一，适合熟悉张量和斯托克斯定理等流形理论的读者，可作为研究生一学年课程的教材。

## &lt;&lt;黎曼几何&gt;&gt;

## 书籍目录

Preface Chapter 1. Riemannian Metrics 1. Riemannian Manifolds and Maps 2. Groups and Riemannian Manifolds 3. Local Representations of Metrics 4. Doubly Warped Products 5. Exercises Chapter 2. Curvature 1. Connections 2. The Connection in Local Coordinates 3. Curvature 4. The Fundamental Curvature Equations 5. The Equations of Riemannian Geometry 6. Some Tensor Concepts 7. Further Study 8. Exercises Chapter 3. Examples 1. Computational Simplifications 2. Warped Products 3. Hyperbolic Space 4. Metrics on Lie Groups 5. Riemannian Submersions 6. Further Study 7. Exercises Chapter 4. Hypersurfaces 1. The Gauss Map 2. Existence of Hypersurfaces 3. The Gauss-Bonnet Theorem 4. Further Study 5. Exercises Chapter 5. Geodesics and Distance 1. Mixed Partial 2. Geodesics 3. The Metric Structure of a Riemannian Manifold 4. First Variat of Energy 5. The Exponential Map 6. Why Short Geodesics Are Segments 7. Local Geometry in Constant Curvature 8. Completeness 9. Characterization of Segments 10. Riemannian Isometries 11. Further Study 12. Exercises Chapter 6. Sectional Curvature Comparison I 1. The Connection Along Curves 2. Second Variation of Energy 3. Nonpositive Sectional Curvature 4. Positive Curvature 5. Basic Comparison Estimates 6. More on Positive Curvature 7. Further Study 8. Exercises Chapter 7. The Bochner Technique 1. Killing Fields 2. Hodge Theory 3. Harmonic Forms 4. Clifford Multiplication on Forms 5. The Curvature Tensor 6. Further Study 7. Exercises Chapter 8. Symmetric Spaces and Holonomy 1. Symmetric Spaces 2. Examples of Symmetric Spaces 3. Holonomy 4. Curvature and Holonomy 5. Further Study 6. Exercises Chapter 9. Ricci Curvature Comparison 1. Volume Comparison 2. Fundamental Groups and Ricci Curvature 3. Manifolds of Nonnegative Ricci Curvature 4. Further Study 5. Exercises Chapter 10. Convergence 1. Gromov-Hausdorff Convergence 2. Hilber Spaces and Schauder Estimates 3. Norms and Convergence of Manifolds 4. Geometric Applications 5. Harmonic Norms and Ricci curvature 6. Further Studv 7. Exercises Chapter 11. Sectional Curvature Comparison 2Appendix. De Rham CohomologyBibliographyIndex
