

<<飞秒激光脉冲>>

图书基本信息

书名：<<飞秒激光脉冲>>

13位ISBN编号：9787030187918

10位ISBN编号：7030187911

出版时间：2007-4

出版时间：科学

作者：吕利埃

页数：426

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<飞秒激光脉冲>>

内容概要

本书主要面向高年级本科生，首先阐述了激光和脉冲光学的基础知识；然后分别介绍短/超短激光脉冲及其产生、操控和测量以及分光镜的应用。

本书在第一版的基础上作了全面的修订，增加两章以介绍超快现象中最有前景和发展最快的领域——相干控制和阿秒脉冲。

书籍目录

Preface Contributors 1 Laser Basics C. Hirshman 1.1 Introduction 1.2 Stimulated Emission 1.2.1 Absorption 1.2.2 Spontaneous Emission 1.2.3 Stimulated Emission 1.3 Light Amplification by Stimulated Emission 1.4 Population Inversion 1.4.1 TWO-Level System 1.4.2 Optical Pumping 1.4.3 Light Amplification 1.5 Amplified Spontaneous Emission (ASE) 1.5.1 Amplifier Decoupling 1.6 The Optical Cavity 1.6.1 The Fabry-Pérot Interferometer 1.6.2 Geometric Point of View 1.6.3 Diffractive-Optics Point of View 1.6.4 Stability of a Two-Mirror Cavity 1.6.5 Longitudinal Modes 1.7 Here Comes the Laser ! 1.8 Conclusion 1.9 Problems Further Reading Historical References 2 Pulsed Optics 3 Methods for the Generation of Ultrashort Laser Pulses: Mode-Locking 4 Further Methods for the Generation of Ultrashort Optical Pulses 5 Pulsed Semiconductor Lasers 6 How to Manipulate and Change the Characteristics of Laser Pulses 7 How to Measure the Characteristics of Laser Pulses 8 Spectroscopic Methods for Analysis of Sample Dynamics 9 Coherent Effects in Femtosecond Spectroscopy: A Simple Picture Using the Bloch Equation 10 Terahertz Femtosecond Pulses 11 Coherent Control in Atoms, Molecules and Solids 12 Attosecond Pulses Index
