

<<Globalization Challe>>

图书基本信息

书名：<<Globalization Challenge And Management Transformation (全3册)>>

13位ISBN编号：9787030193728

10位ISBN编号：7030193725

出版时间：2007-7

出版时间：科学

作者：张金隆

页数：2152

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

《Globalization Challenge And Management Transformation (全3册)》涵盖了管理科学的各个理论与实践领域,包括生产运作管理、信息管理、市场营销、财务与金融、会计、科技管理、人力资源管理、组织行为、管理理论与方法等等学术范畴的最新研究。

书籍目录

VOL. EECTION ONE Management Science An Agent-Based Knowledge Transfer Model for Implementing and Operating ERP Systems An Adaptive Particle Swarm Algorithm for Global Optimization A Study on Dynamic Modeling for Chinese Resident ' S Consumption and Investment Decision with Housing New Formulations for Second . Best Congestion Pricing Problems on a General Transportation Network with Elastic Demands : An Excess-Demand Approach Fuzzy MPMP Production Planning Problem with Minimum Risk Criteria Optimizing Designs to Improve the Blockage Behavior of Emergency Networks An Approach to Solve Large Scale Multiple Traveling Salesman Problem with Balanced Assignment Optimization Methods and Models Supplier Selection for N-Product under Uncertainty : A Simulation-Based Optimization Method A Feasible Case Study of Applying Critical Chain Multi—Project Management in Semiconductor Turnkey Services A Fuzzy Multi . Objective Programming for Optimization of Reverse Logistics for Solid Waste The FIP Problem with Uncertain Demand in Several Scenarios Information Sharing Strategy and Data Processing Model for SMLE Alliance Solving Capacitated Facility Location Problem Using Tabu Search Research on the Hybrid Ant Colony Labor Division Algorithm with Optimization and Its Application Semicontinuity of the Solution Mapping of e-Vector Equilibrium Problem Optimization of Distribution Network Design Based on Retailer Satisfaction Optimizing Linear Optimization Problems under Fuzzy Relational Equations with Max-Star CompositionSECTION TOW Operational Management Operational Management Virtual Cellular Manufacturing Systems : Emerging Research Issues in Global Manufacturing&Supply Chain Contexts A Study on the Performance Characteristics of Closed-loop Asynchronous Automatic Assembly Systems Container S10t Allocation Model with Liner Shipping Revenue Management Production Order Evaluation Based on Neutral Network Model Distribution the TOC Way : Review and a Case Study The Research on Distribution of Large Scale Chains Enterprise with Time Window Multi . Objective Layout Optimization in Dynamic Environments : A Heuristic Approach A Centralized Inventory Policy for Open—Loop Reverse Supply Chain Research on Development of Modern Logistic Industry in Area along New Eurasian Land Bridge(China ' S Section)Based on Spatial Economic Relationship A Simulation Based Research on Loading—Unloading Strategy in Railway Container Terminal A Fuzzy Evaluation Method of Integrated Logistics Service Networks Formulation and Complexity Analysis for 3PL Transportation Problems Study of the Partial Task Management under Constrained Resources A Study on Guaranteed Delivery Time Based Inventory Model of Component Commonality in Assemble-to-Order Systems Outsourcing Decision—Making of Equipment Maintenance in Process Industries A Location-Allocation Problem Applying in Scrap Steel Recycling Network Design A Dynamic Inventory / Allocation Problem Based on Internet Auctions

SECTION THREE Decision Theory and Application SECTION FOUR Information Management and E-CommerceVOL. VOL.
