## <<二语写作的认知>>

### 内容概要

本研究以最具应用、指导价值的语言学分支——认知及功能语言学为强大的理论支撑，建立起了可以整合当前各主要写作研究流派(包括过程写作、产品写作及体裁写作)的认知功能语言学过程写作框架

。该框架主要包括可以详细描述从思想产生到词汇语法意象图式形成直至最后文字产出的全过程的写作模型，还包括用于对写作文本进行语篇分析的分析模式。

全书的写作模型主要融合了本书所提出的“扩展的意象图式系统(EISS)”、Langacker(2001)的认知语篇语法、Flower和Hayes(1980, 2006)为代表的过程写作模式，以及功能语法关于语境和语类/体裁的思想

。该书可供各大专院校作为教材使用，也可供从事相关工作的人员作为参考用书使用。

## 书籍目录

前言 Acknowledgements Abstract Chapter 1 Introduction Chapter 2 Review of Literature on Rhetoric and Writing Research 2.1 Introduction 2.2 Product-oriented approaches 2.3 Process-oriented approaches 2.3.1 Pre-writing 2.3.2 Drafting 2.3.3 Rewriting 2.3.4 Other components in Flower and Hayes' writing process model (1980) 2.3.5 Verbal protocols--the major means of research within this writing-as-process paradigm 2.3.6 New developments of the Flower-Hayes 1980 model 2.3.7 Instances of writing-as-process model as applied in ESL/EFL writing research 2.4 The process-oriented versus product-oriented writing approaches 2.5 For a comprehensive theory of writing 2.6 A review of major linguistic studies on writing 2.6.1 The transformational-generative approach to writing 2.6.2 Genre and the textlinguistics approach to writing 2.6.3 The application of cognitive linguistics in writing research 2.7 Revisiting the processes in generating the text 2.8 On the social context and attitudes which influence writing (and the writer) 2.9 Review of current college writing textbooks and teaching method 2.10 Application of writing-as-cognitive-functional-linguistic process model Chapter 3 A Theoretical Framework for Our Cognitive-Functional Approach 3.1 Theoretical backgrounds 3.1.1 (Transformational) Generative Grammar 3.1.2 Systemic Functional Grammar 3.1.3 Cognitive Linguistics: a general survey 3.2 Some relevant details of cognitive functional linguistic studies 3.2.1 The Billiard-ball model 3.2.2 The Stage model 3.2.3 Transitivity 3.2.4 Grammatical relations 3.2.5 Voice, de/focusing, prominence, and dimensions of specificity 3.2.6 Nominalization and verbalization 3.2.7 Conceptual metaphor and the language of metaphor 3.2.8 Extended image schema theory Chapter 4 A Cognitive-Functional-Linguistic-Process Writing Model 4.1 Introduction 4.2 A cognitive-functional-linguistic-process writing model 4.2.1 The architecture and working mechanism 4.2.2 A further discussion on EFL writing under our model Chapter 5 Research Design and Methodology 5.1 Qualitative vs. Quantitative 5.2 Participants 5.3 Treatment and the teaching materials 5.3.1 Treatment 5.3.2 Teaching materials 5.4 Assessment 5.4.1 Quantitative assessment 5.4.2 Qualitative evaluation 5.5 Triangulation Chapter 6 Statistical Results and Qualitative Analysis 6.1 General introduction 6.2 Marking and its results 6.2.1 Markers and marker training 6.2.2 Presentation of the marking results 6.3 Data treatment 6.3.1 On the conceptual metaphor compositions 6.3.2 On the image schema compositions 6.3.3 On the cognitive grammar compositions 6.4 Summary 6.5 A qualitative analysis of the compositions with cognitive-functional linguistic tools 6.5.1 An Analysis on the treatment effects of the metaphorical group 6.5.2 An Analysis on the treatment effects of the image schema group 6.5.3 An Analysis of the treatment effects of the cognitive grammar group 6.5.4 Chapter Summary Chapter 7 Concluding Summary and Research Implications 7.1 A summarizing analysis of the responses to training in all the chosen posttest writings 7.2 Summary, discussion, and implications Bibliography

## 章节摘录

The foundations of cognitive stylistics ( also called cognitive poet-ics ) are mostly in cognitive linguistics and CL-friendly cognitive psy-chology, which take as their premise that all forms of expression and conscious perception are bound up with our biological endowment. As Stockwell ( 2002, p.4 ) puts it, "Most simply, we think in the form that we do and we say things in the ways that we do because we are all roughly human-sized containers of air and liquid and with our main receptors at the top of our bodies". We can imagine that, even with a slight change in the band of wavelengths that we can see and the range of sound frequencies that we can hear with our naked eyes and ears, the world would be totally different for us. As cognitive linguistics is a branch of functionalism ( Langacker, 2001b, p.143 ) , cognitive stylistics also encompasses situational context and socio-cultural context, along with personal circumstances. Besides establishing and refining its theoretical framework, cognitive stylistics seeks as a top priority to provide insight into the working mechanism of creative language use in literature and in everyday discourse. Up until now most of its applications have been in helping readers to understand and appreciate poems, works of fiction, comic strips and advertisements, such as Margaret Freeman's cognitive stylistic analysis of certain grammatical patterns in the poetry of Emily Dickinson ( 1997 ) , Peter Crisp's contribution to applying CL theory in allegory study ( 2001, 2005 ) , Stockwell's study on such issues as image schemas in science fiction and Shakespeare's Macbeth ( 2002, 2003 ) , Turner's analysis of Walt Disney classics with blending theory ( 2006 ) , Semino's analysis of blending and characters' mental functioning in Virginia Woolf's "Lappin and Lapinova" ( 2006 ) , Oakley's Event Frame and force dynamic approach to rhetorical analysis ( 2005 ) , and all the papers in the book Cognitive Poetics in Practice edited by Gavins & Steen ( 2003 ) .
