编辑推荐

《中国制造业发展研究报告(英文版)》:In 2003, The Education Ministry of the PRC invited public bidding across the country for 40 "Key Projects of Philosophy and Social Science" for the first time. After stiff competition, the research team led by Prof. Li Lianshui won the bidding for "Research on Eastern Super-Metropolis Zone and the World Manufacturing Industry Center" (No. 03JZD0014), with a granted research fund of 500, 000. Later on, the team won two National Science Fund projects--"Research on the Development Path for China's Manufacturing Industry Based on Resource-Restraint and Self-Innovation" and "Research on the Development of China's Manufacturing Industry", as well as a series of provincial-level research projects.
