

<<2008汶川大地震>>

图书基本信息

书名：<<2008汶川大地震>>

13位ISBN编号：9787030307842

10位ISBN编号：7030307844

出版时间：2011-1

出版时间：科学出版社

作者：陈颢

页数：276

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<2008汶川大地震>>

### 内容概要

The Wenchuan

Earthquake of 2008 Anatomy of a Disaster gives a detailed account of the damage, seismology and tectonics of the event and discusses earthquake prediction, seismic hazard and risk management, the creation and implementation of building codes, and new practices used in rescue, relief and reconstruction. It will be of significant interest to researchers and practitioners engaged in seismology, geophysics, engineering, the social sciences, and disaster management and recovery. It also offers a valuable new and unique Chinese perspective with many insights for future mitigation of earthquake risk.

<<2008汶川大地震>>

书籍目录

- 1 The Wenchuan earthquake
  - 1.1 Intensity map and damage distribution
    - Intensity map
    - Intensity XI and X zones
    - Strong motion records
    - General trend of earthquake damage
  - 1.2 Death toll and economic losses
    - Demography and death toll
    - GDP losses
    - Hardest hit area
    - "Quick and approximate" estimation of casualties
  - 1.3 Earthquake damage to buildings
    - Damage to buildings according to structural type
    - Damage to buildings according to age
    - Damage to buildings according to use
    - Lessons learned
  - 1.4 Earthquake damage to lifelines
    - Transportation
    - Railway systems
    - Electricity, water supply, sewage and telecommunication
    - "Quake lakes"
  - 1.5 Secondary disasters: landslides and rock falls
    - Geomorphology of Wenchuan region
    - Giant landslides
    - Mud flows
    - Rock falls
  - References
- 2 Seismological features
  - 2.1 Seismic source parameters for the mainshock
    - Source parameters
    - Focal mechanism
    - Rupture process
    - Co-seismic deformation
  - 2.2 Historical earthquakes and aftershocks
    - Historical earthquakes
    - Aftershocks
  - 2.3 Geophysical investigations before the earthquake
    - North-South seismic belt
    - Bouguer gravity anomalies
    - Crustal thickness

<<2008汶川大地震>>

Low-velocity zones

2.4 Tectonic setting of Wenchuan earthquake

Tibetan Plateau

Longmenshan

An intracontinental thrust fault

Weak crustal layer

2.5 Seismic waves generated by earthquake

Seismic waves circle the Earth

Ground motion felt at Beijing

Comparison with waves generated by Tangshan earthquake

of 1976

References

3 Prediction efforts prior to the Wenchuan earthquake

3.1 Earthquake monitoring system in China

National earthquake monitoring network

Other geophysical observations

Data processing and analysis procedures

3.2 Prediction efforts prior to the Wenchuan earthquake

Seismic network of 300 seismometers

Big shock, small GPS displacement

Seismicity pattern

Precursor anomalies

3.3 Development of earthquake prediction research in China

Severe earthquake disasters in China

Organized efforts for earthquake prediction (1966)

China Earthquake Administration (CEA)

Haicheng earthquake prediction

Earthquake Act

3.4 Future prospects for earthquake prediction

Realistic public expectation of earthquake prediction

Why is the prediction effort so persistent?

From prediction to mitigation

References

4 Seismic hazard and risk assessment

4.1 Seismic hazard assessment

1957--First intensity zoning map of China

1977 intensity zoning map of China

1990 intensity zoning map of China

## <<2008汶川大地震>>

2001--Latest hazard map of China

4.2 Building code

Building code (TJ11-78)--effective  
1979-1990

Building code (GBJ11-89)--effective  
1991-2001

Building code (GB50011-2001)

Importance of complying with the seismic  
design code

4.3 Risk management

Quantification of disaster

Fortification standards should be  
increased

Earthquake-safe Rural

Housing' Demonstrations

4.4 Did the reservoir impoundment trigger the  
Wenchuan  
earthquake?

References

5 Emergency response and resscue

5.1 People-oriented rescue principle

Immediate top level government  
response

So long as there was hope, they would never  
give up

Respect for life

5.2 Open and transparent relief information

Timely, open and transparent  
information

International relief

Rescue efforts

5.3 The breadth and diversity of donors

Donations from countries and regions

Donations from NGOs

The breadth and diversity of donors

5.4 Voluntary contributions

An individual voluntary response

Rewards of voluntary work

Medical volunteers

Importance of psychological  
assistance

References

6 Reconstruction of Wenchuan

6.1 Outline of reconstruction

Overall planning

Reconstruction objectives

Reconstruction funds

<<2008汶川大地震>>

6.2 Counterpart assistance

New mechanism of post-earthquake reconstruction

Prom counterpart assistance to counterpart cooperation

6.3 Solid schools, sweet hopes

Schools in reconstruction

Hospitals and other public facilities

6.4 New Wenchuan after the earthquake

All be housed

Life goes on

The main lessons of the earthquake

References

Appendices

Appendix 1 Significant events of Wenchuan earthquake

Appendix 2 Wenchuan earthquake sequence catalog

Appendix 3 Law of the People's Republic of China on Protecting

Against and Mitigating Earthquake

Disasters

Appendix 4 The Overall Planning for Post-Wenchuan Earthquake

Restoration and Reconstruction

(Extracts)
