<<中医学概论>>

内容概要

本书由中国中医科学院的多名专家学者共同编写，旨在为国外中医药院校提供一部简明易学的中医学入门教材。

内容包括绪论、阴阳五行、藏象、精气血津液、经络、病因、病机等几部分。

重点突出，简明扼要。

本书可作为国外中医初学者的入门读物，也可供从事中医药宣传、普及及教育等人员参考。

本书由Give2Asia项目资助出版。

<<中医学概论>>

书籍目录

FOREWORD

CHAPTER ONE INTRODUCTION

The Formation, Development and Basic Theory of TCM

The Characteristics of TCM

CHAPTER TWO YIN-YANG AND THE FIVE ELEMENTS

Yin-Yang Theory

The Five-phase theory

CHAPTER THREE THE ZANG-FU ORGANS

The Five Zang-Organs

The Six Fu-Organs

The Extra Fu-Organs

CHAPTER FOUR THE ESSENCE, QI, BLOOD AND BODY-FLUIDS

Essence

Qi

Blood

Body-fluid

Relationship of Qi, Blood, Body-fluid

CHAPTER FIVE THE MERIDIANS AND COLLATERALS

Twelve Regular Meridians

Eight Extra Vessels

Physiological Functions and the Application of Meridian and

Collaterals

CHAPTER SIX ETIOLOGY

Exogenous Pathogenic Factors

Endogenous Pathogenic Factors

Endogenous Pathogens from Pathological Processes

Non-Endogenous and Non-Exogenous Pathogenic Factors

CHAPTER SEVEN PATHOGENESIS

Vital-qi and Pathogenic Factors

Imbalance between Yin and Yang

Disorder of Qi and Blood

章节摘录

5. Yinqiao Mai and Yangqiao Mai (Yin Heel and Yang Heel Vessel) The Yinqiao mai originates from the heel and ascends along the anterior of the body. It ascends first to the medial alveolus. It then travels straight up along the back of the medial side of the leg to the external genitalia. Traveling along the surface of abdomen , it ascends into the supraclavicular fosse. It ascends adjacent to the Adam's apple , ending in the inner cantus , where it communicates with the Yangqiao mai. The Yangqiao mai originates at the heel and travels upward along the back of the body. It ascends along the external alveolus and up the lateral side of the leg. It passes through the waist to travel along the back of the ribcage. It ascends to the shoulder and the supraclavicular fosse , then travels up the neck to the corner of the mouth. At the inner cantus it communicates with the Yinqiao mai. It continues upward to the forehead , following the Urinary bladder meridian of foot-toying. It terminates at the nape of the neck , where it meets the Gallbladder meridian of foot-shaoyang. They govern the movement of the lower extremities.Both meridians nourish the eyes , control their opening and closing. There is an old saying that "Yinqiao and Yangqiao are in charge of Yin and Yang of either side of the body respectively."
