

<<制造工程与技术>>

图书基本信息

书名：<<制造工程与技术>>

13位ISBN编号：9787040161014

10位ISBN编号：704016101X

出版时间：2005-1

出版时间：蓝色畅想

作者：卡尔帕克杰恩

页数：353

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<制造工程与技术>>

内容概要

《制造工程与技术（第4版改编版）》是在Serope Kalpakian等主编的Manufacturing Engineering and Technology（Fourth Edition）教材的基础上改编而成的，改编后的教材既保留了国外原版教材的风格，又适合国内教学的需要，是优秀的“双语”教学教材。

《制造工程与技术（第4版改编版）》除绪论外共三篇20章，第一篇为工程材料基础，主要介绍的金属材料、非金属材料、复合材料的特性、选用方法及在工程扣的实际应用，并对纳米材料及高分子材料做了介绍。

第二篇为材料成形技术，本篇不仅介绍了传统的铸锻工艺、精密锻造以及粉末冶金、塑料和复合材料的成形技术，还介绍了快速原型和快速模具技术；第三篇为机械加工技术，除了对传统的各种机加工工艺进行了介绍外，还介绍了高速切削加工、现代加工中心、先进刀具和磨削材料、非传统加工技术（化学、电火花、超声、等离子、激光加工等）以及正在逐渐成为现代制造领域的一个重要发展方向的纳米制造和微细加工等先进制造技术。

为了便于读者阅读，本教材在每一章后面都附有中文注释和主要的专业术语，而且在书末还附有按字母顺序排列的中英文对照词汇表。

《制造工程与技术（第4版改编版）》可作为机械设计制造及其自动化专业以及机电类其他相关专业的本科生或研究生的英文教材，也可供相关的工程技术人员参考。

作者简介

作者：(美国)卡尔帕克杰恩

书籍目录

General Introduction 11 . What's Manufacturing? 12 . The Design Process and Concurrent Engineering 63
 . Selecting Materials 114 . Selecting Manufacturing Processes 135 . Computer-Integrated Manufacturing 186
 . Global Competitiveness and Manufacturing Costs 217 . Lean Production and Agile Manufacturing 228
 . Environmentally Conscious Design and Manufacturing 23PART I Fundamentals of Materials : Their Behavior
 and Manufacturing Properties1 The Structure of Metals 291 . 1 Introduction 291 . 2 The Crystal Structure of
 Metals 301 . 3 Cold Warm and Hot-Working 311 . 4 Work Hardening(Strain Hardening) 321 . 5 Plastic
 Deformation of Polycrystalline Metals 322 Mechanical Behavior . Testing . and Manufacturing Properties of
 Materials 372 . 1 Introduction 372 . 2 Tension 382 . 3 Compression 422 . 4 Corrosion 432 . 5 Bending(Flexure)
 442 . 6 Hardness 453 Physical Properties of Materials 513 . 1 Introduction 513 . 2 Density 513 . 3 Melting Point
 553 . 4 Specific Heat 553 . 5 Thermal Conductivity 553 . 6 Thermal Expansion 563 . 7 Electrical , Magnetic
 , and Optical Properties 573 . 8 Corrosion Resistance 584 Metal Alloys Structure and Cast Irons 634 . 1
 Introduction 634 . 2 Structure of Alloys 644 . 3 The Iron-Carbon System 674 . 4 Cast Irons 695 Ferrous Metals
 and Alloys 755 . 1 Introduction 755 . 2 Production of Iron and Steel 765 . 3 Carbon and Alloy Steels 795 . 4
 Tool and Die Steels 826 Nonferrous Metals and Alloys 856 . 1 Introduction 856 . 2 Aluminum and Aluminum
 Alloys 876 . 3 Magnesium and Magnesium Alloys 886 . 4 Copper and Copper Alloys 906 . 5 Superalloys 916 . 6
 Titanium and Titanium Alloys 926 . 7 Low-Melting Alloys 936 . 8 Precious Metals 966 . 9 Shape-Memory
 Alloys 966 . 10 Amorphous Alloys(Metallic Glasses) 976 . 11 Nanomaterials 977 Polymers : Structure . General
 Properties . and Applications 1017 . 1 Introduction 1017 . 2 The Structure of Polymers 1037 . 3 Thermoplastics
 1087 . 4 Thermosetting Plastics 1097 . 5 Additives In Plastics 1107 . 6 General Properties and Applications of
 Thermoplastics 1117 . 7 General Properties and Applications of Thermosetting Plastics 1147 . 8 Biodegradable
 Plastics 1157 . 9 Elastomers (Rubbers) 1178 Composite Materials : Structure , General Properties , and
 Applications 1218 . 1 Introduction 1218 . 2 The Structure of Reinforced Plastics 1228 . 3 Properties of
 Reinforced Plastics 1268 . 4 Applications of Reinforced Plastics 1278 . 5 Metal-Matrix Composites(MMC) 1308
 . 6 Ceramic-Matrix Composites(CMC) 1318 . 7 Other Composites 131PART II Forming and Shaping Processes
 and Equipment Fundamentals of Metal-Casting 1359 . 1 Introduction 1359 . 2 Solidification of Metals 1379 . 3
 Metal-Casting Processes 140 Open-Die Forging of Metals 15710 . 1 Introduction 15710 . 2 Open Die Forging
 15910 . 3 Impression-Die and Closed-Die Forging 16110 . 4 Extrusion and Drawing 16411 Processing of Powder
 Metallurgy 16911 . 1 Introduction 16911 . 2 Production of Metal Powders 17111 . 3 Compaction of Metal
 Powders 17611 . 4 Sintering 17711 . 5 Process Capabilities 18011 . 6 Economics of Powder Metallurgy 18112
 Forming and Shaping Plastics and Composite Materials 18312 . 1 Introduction 18312 . 2 Injection Molding
 18412 . 3 Blow Molding 18713 Rapid-Prototyping Operations 19113 . 1 Introduction 19113 . 2 Additive
 Processes 19213 . 3 Applications of Rapid-Prototyping Technology 200PART III Material-Removal Processes and
 Machines 4 Fundamentals of Cutting 21114 . 1 Introduction 21114 . 2 The Mechanics of Chip Formation 21414
 . 3 The Types of Chips Produced In Metal-Cutting 21614 . 4 Cutting Forces and Power 21814 . 5 Tool Life
 : Wear and Failure 22214 . 6 Surface Finish and Surface Integrity 22514 . 7 Machinability 22715 Cutting : Tool
 Materials and Cutting Fluids 23515 . 1 Introduction 23515 . 2 Carbon and Medium . Alloy Steels 23915 . 3
 High-Speed Steels 23915 . 4 Cast . Cobalt Alloys 24015 . 5 Carbides 24015 . 6 Coated Tools 24515 . 7
 Alumina-Based Ceramics 24615 . 8 Cubic Boron Nitride 24715 . 9 Silicon . Nitride Based Ceramics 24815 . 10
 Diamond 24815 . 11 Whisker-Reinforced and Nanocrystalline Tool Materials 24916 Machining Processes Used to
 Produce Round Shapes 25316 . 1 Introduction 25316 . 2 Turning Parameters 25616 . 3 Lathes and Lathe
 Operations 25916 . 4 High-Speed Machining , Ultraprecision Machining , and Hard Turning 26716 . 5 Boring
 and Boring Machines 27016 . 6 Drilling and Drills 27217 Machining Processes Used to Produce Various Shapes
 27917 . 1 Introduction 27917 . 2 Milling Operations 28017 . 3 Milling Machines 28917 . 4 Planing and Shaping
 29218 Machining and Turning Centers 29518 . 1 Introduction 29518 . 2 Machining and Turning Centers 29518
 . 3 Machining Economics 30319 Abrasive Machining and Finishing Operations 30919 . 1 Introduction 30919 . 2

<<制造工程与技术>>

Abrasives 31119 . 3 Bonded Abrasives r Grinding Wheels) 31319 . 4 Honing 31719 . 5 Lapping 31819 . 6
Polishing 31819 . 7 Electropolishing 31919 . 8 Polishing Processes Using Magnetic Fields 31919 . 9 Buffing 32020
Advanced Machining Processes and Nanofabrication 32320 . 1 Introduction 32320 . 2 Chemical Machining
32520 . 3 Electrical-Discharge Machining 32720 . 4 Wire EDM 33020 . 5 Laser-Beam Machining 33120 . 6
Electron-Beam Machining and Plasma-Arc Cutting 33420 . 7 Nanofabriation 33520 . 8 Micromachining 33720
. 9 Economics of Advanced Machining Processes 338中英文对照词汇表343

章节摘录

Manufacturing , in its broadest sense , is the process of converting raw materials into products . It encompasses(1)the design of the product , (2)the selection of raw materials , and(3)thesequence of processes through which the product will be manufactured . Manufacturing is the backbone of any industrialized nation . Its importance is emphasized by thefact that , as an economic activity , it comprises approximately 20% to 30 % of the value of all goods and services produced . A country" S level of manufacturing activity is directly related to its economichealth . Generally , the higher the level of manufacturing activity in a country , the higher thestandard of living of its people . Manufacturing also involves activities in which the manufactured product is itself used to makeother products . Examples of these products are large presses to shape sheet metal for car bodies , machinery to make bolts and nuts , and sewing machines for making clothing . An equally important aspect of manufacturing activities is the servicing and maintenance of this machinery during its useful life. PAGE2 The design process for a product first requires a clear understanding of the functions and theperformance expected of that product . The product may be new , or it may be a revised version ofan existing product . We all have observed , for example , how the design and style of radios , toasters , watches , automobiles , and washing machines have changed . The market for a product and its anticipated uses must be defined clearly , with the assistance ofsales personnel , market analysts , and others in the organization . Product design is a critical activitybecause it has been estimated that 70% to 80% of the cost of product development and manufaetureis determined by the decisions made in the initial design stages .

编辑推荐

本书是在我国高校机械课程开展"双语"教学的情况下,由国外原版教材改编而来的,该教材近进一步加强了机械类课程与国外高校的交流,引进了国外先进的制造技术与教学思想,尤其是对近年来出现的高速切削、快速原型制造等新技术也用了一定篇幅的介绍,是一本非常难得的优秀高校双语教材。
