章节摘录

Taking into account the schools circumstances, colleges and universities should follow the guidelines of the Requirements and the goals of their College English teaching in designing their College English course systems. A course system, which is a combination of required and elective courses in comprehensive English, language skills, English for practical uses, language and culture, and English of specialty, should ensure that students at different levels receive adequate training and make improvement in their ability to use English. In designing College English courses, requirements for cultivating competence in listening and speaking should be fully considered, and corresponding teaching hours and credits should be adequately allocated. Moreover, the extensive use of advanced information technology should be encouraged, computer-and Web-based courses should be developed, and students should be provided with favorable environment and facilities for language learning. College English is not only a language course that provides basic knowledge about English, but also a capacity enhancement course that helps students to broaden their horizons and learn about different cultures in the world. It not only serves as an instrument, but also has humanistic values. When designing College English courses, therefore, it is necessary to take into full consideration the development of studentscultural capacity and the teaching of knowledge about different cultures in the world.
